LOOKING BACK ON SEVENTY YEARS OF GREATNESS.

For seven decades the Model 70 has undergone an evolutionary process and emerged as the finest sporting rifle in the world. While some still hold dear the Model 70 of bygone days, it is today's Model 70 that represents the pinnacle in terms of quality, accuracy and reliability. As the Model 70 moves proudly into yet another era, know that this process of innovation and improvement will continue, assuring its rightful place as "The Rifleman's Rifle."

1936 1939 1952 1955 1956 1959 1964 1992 1994 2000

The Winchester Model 54 is redesigned and becomes the Winchester Model 70. 2,238 rifles were built during the first year.

The Model 70 Featherweight is introduced.

The Model 70 African is introduced along with the new 458 Winchester Magnum cartridge.

A new push-feed system in the Model 70 is introduced. All earlier rifles become known as Pre-'64 Model 70s.

The long-awaited return of the Pre-'64 Model 70 action design with claw extraction, controlled round feed and many other endearing features.

The Model 70 begins making its mark in highpower rifle competition.

The Model 70 Varmint rifle is introduced.

The Model 70 Alaskan is introduced along with the new 338 Winchester Magnum cartridge.

Stainless steel construction and a detachable box magazine are introduced on the Model 70.

The Model 70 is named "Bolt-Action Rifle of the Century" by *Shooting Times Magazine*.

For Winchester Rifles and Shotguns, the year 2006 is sure to be one to remember. In addition to a long list of innovative new firearms, 2006 also marks the anniversaries of two of the most popular and influential products ever in the hunting and shooting industry: 70 years of the Winchester® Model 70 rifle and 100 years of the 30-06 Springfield cartridge. Over the years these two products have been successfully teamed together, each helping to shape the other's success, and are the most versatile and effective combinations for hunting and target shooting. To celebrate these two historic events, we're introducing two limited edition Model 70s in 30-06, and every Pro Shadow and Shadow Elite rifle will be fitted with a 70th Anniversary Model 70 grip cap medallion.

The innovation continues with the introduction of the new Winchester SXR autoloading rifle. This fast-handling rifle features rugged good looks, and incredible accuracy and speed from the ultra-fast, recoil-reducing, gas-operated action.

The new Winchester Super X3 autoloading shotgun is light in weight and features slim new stock and forearm dimensions for a quick and nimble feel. Proven Active Valve technology ensures reliability to make your days afield successful and memorable.

2006 represents our best offering ever of new products and old favorites. Know that Winchester Rifles and Shotguns will continue the quest to bring you the finest firearms available anywhere. We hope you'll be part of that journey.

CHARTS

2001

The Model 70 is chambered for the revolutionary Winchester Short Magnum (WSM) cartridges, named "Ammunition of the Year."

2003

The Model 70 Super Shadow is voted "Rifle of the Year" by the readers of *Guns & Ammo Magazine*.

The innovative Controlled Round Push Feed bolt design is officially introduced, giving every Winchester Model 70 customer the benefits of controlled round feed.

2004

The Model 70 Coyote Lite is introduced. The 325 WSM joins the Winchester Short Magnum lineup.

The Model 70 Super Shadow is awarded the 2005 NRA Golden Bullseye Award for "Rifle of the Year."

2005

2006

The Model 70 Shadow Elite is introduced, along with special commemorative editions celebrating 70 years of the Model 70 and 100 years of the 30-06 Springfield cartridge.

The Model 70 is chambered for the new Winchester Super Short Magnum (WSSM) calibers. The Model 70 Stealth II is voted "Rifle of the Year" by the readers of *Guns & Ammo Magazine*.

MODEL 70: THE FUTURE GENERATION.

Image courtesy of Winfield Galleries, LLC

Seventy years ago a new rifle was born in New Haven, Connecticut, and was named the Winchester® Model 70. It was Winchester's first centerfire bolt-action designed specifically for sporting use, and quickly became known as "The Rifleman's Rifle." No other rifle in modern history has been emulated and imitated like the Model 70. Over the years it has been built in scores of different models and configurations and chambered for a spectrum of cartridges ranging from the smallest varminters up to the bone-crushing African calibers. After seven decades, and more than three million rifles produced, the Model 70 remains the standard against which every other bolt-action rifle is measured. In materials, quality and performance, today's Model 70 is quite simply the finest that has ever been built. Ever.

WinSorb™ Technology pad soaks up punishing recoil, making even the largest calibers and heaviest loads easier to manage.

Rugged, lightweight reinforced composite stock with Mossy Oak® New Break-Up® camo combines stylish design and all-condition performance.

Steel sling swivel bases are standard equipment.

Time-proven three-position safety allows you to cycle unfired cartridges through the action with the safety on.

Blade ejector allows you to control the force of ejection every time the bolt is operated.

Machined steel receiver is two-part epoxy bedded front and rear to enhance accuracy and avoid shifts in zero.

Crisp single-stage trigger gives you precise control over every shot.

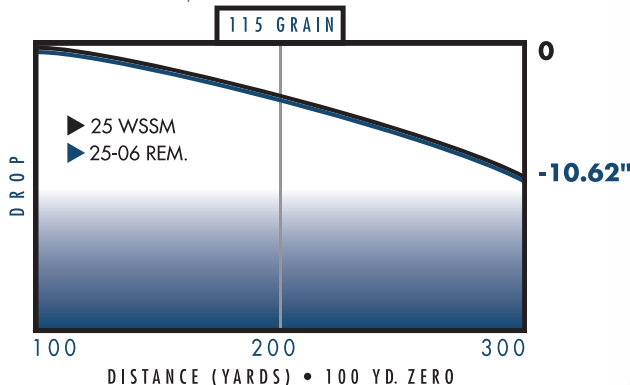

One-piece bottom metal with integrated alloy trigger guard and floorplate offer attractive durability and added rigidity not found in lesser materials.

A "70 Years of Model 70" commemorative grip cap medallion will adorn every Model 70 Pro Shadow and Shadow Elite produced in 2006.

THE 25 WSSM SHOOTS AS FAST AND FLAT AS THE 25-06 REM., YET FITS IN A LIGHT, SUPER-SHORT LENGTH BOLT-ACTION RIFLE.

THE WSSM CALIBERS.

223 WSSM, 243 WSSM, and 25 WSSM.

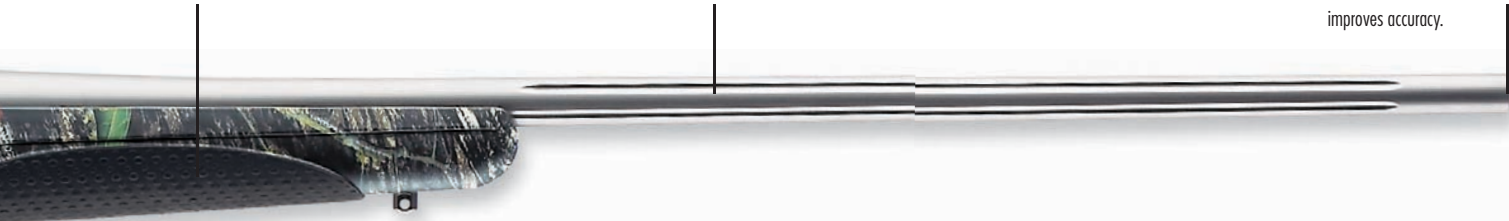

With an overall cartridge length of just 2.36", WSSM calibers have taken the short magnum concept to a new, super-short level. Think of them as supercharged benchrest cartridges. The WSSMs far outperform their standard caliber counterparts and are here to stay. These ultra-compact cartridges deliver high-velocity and extraordinary accuracy in a quick cycling lightweight rifle. The 223 WSSM is particularly effective for varminters and predators, while the 243 WSSM offers solid performance as a crossover caliber. The velocity and solid knockdown power of the 25 WSSM make it perhaps the best whitetail and mule deer cartridge ever developed.

Rubber overmoldings on forearm and pistol grip for enhanced grip and control in any conditions, wet or dry.

Fluted stainless steel barrel is button rifled and free floating for optimum accuracy and long barrel life.

Square cut target crown protects the exposed muzzle rifling and improves accuracy.

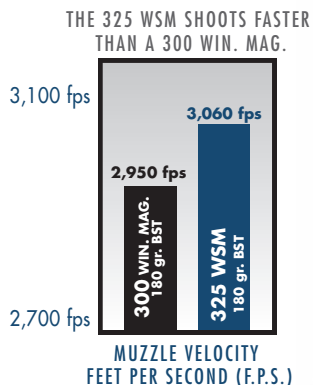

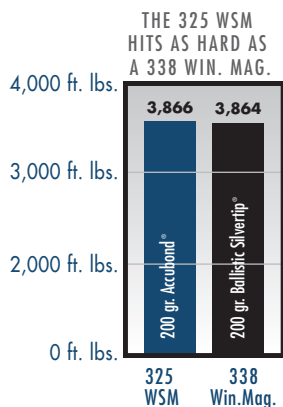

MODEL 70

SHADOW ELITE, CAMO, STAINLESS

SA, LA, MAG

Take a stainless steel Controlled Round Feed action, stainless fluted barrel, floorplate and internal components, and two-part epoxy bed them into a lightweight synthetic stock with oval-dot rubberized overmolded gripping surfaces. Then let it become part of your hunting environment with Mossy Oak® New Break-Up® camo and improve your wet-weather grip with its Dura-Touch® Armor Coating. Now you've got the ultimate Model 70 hunting machine, available in a variety of popular short and long action calibers. See charts beginning on page 52.

THE WSM CALIBERS.

325 WSM, 300 WSM, 7mm WSM, and 270 WSM.

WSM calibers are the new standard of magnum performance. No other calibers offer the efficiency, accuracy or performance of the WSMs. It has been proven that shorter can be better, faster, more accurate and carry as much or more down-range energy as the traditional long-cased magnums. Best of all, WSM calibers do all this in a compact, lighter weight, short action rifle. Currently four different calibers are available: 325 WSM, 300 WSM, 7mm WSM and 270 WSM. A Model 70 chambered in any one of these soon-to-be classic calibers is a rifle you can count on. With magnum ballistics and downrange performance in a short action, lightweight rifle, WSM calibers offer everything a serious big game hunter desires.

MODEL 70 SHADOWS

The Model 70 Shadow stands out by virtue of having the most advanced synthetic stock design in the industry. Every contour and ridge has been carefully engineered to provide maximum strength with minimum weight.

- Controlled Round Feeding on all models
- Time-proven three-position safety
- Grip-enhancing oval-dot panels in overmolded rubber or integrated into stock
- Mock cheekpiece adds strength and reduces weight
- WinSorb™ recoil pad is designed specifically for Shadow stocks and provides cushioning and durability equalling or exceeding the best gel-type pads

A SHORT STORY ON ACTION LENGTH.

See how the four Model 70 action lengths stack up.

1. **Super-Short Action (SSA)** is designed for cartridges up to 2.40" in overall length.
2. **Short Action (SA)** is designed for cartridges up to 3.00" in overall length.
3. **Long Action (LA)** is designed for cartridges up to 3.40" in overall length.
4. **Magnum Action (MAG)** is designed for cartridges up to 3.62" in overall length.

A "70 Years of Model 70" commemorative grip cap medallion will adorn every Model 70 Pro Shadow and Shadow Elite produced in 2006.

NEW

WinSorb™
TECHNOLOGY

You hardly notice the recoil from your rifle when taking a shot at a trophy animal. It's all those shots you fire from the bench while sighting-in and practicing that take their toll. Winchester Model 70 rifles employ maximum recoil reduction for greater comfort. Look for the finest energy-absorbing recoil pad designs where it matters most, on rifles chambered in magnum calibers and on all Shadow series rifles.

NEW

**MODEL 70
PRO SHADOW, BLUED**

SA, LA

NEW

**MODEL 70
PRO SHADOW, STAINLESS**

SA, LA, MAG

From a lofty treestand deep in a hardwood forest to the open slopes and steep peaks of the Rockies, the Model 70 Pro Shadow is designed for serious hunters who are looking for a serious rifle, one that's ready to stalk wary prey without being seen. The rugged, lightweight synthetic stock with oval-dot gripping surfaces and Dura-Touch® Armor Coating gives comfort and control, even in the worst weather. The Pro Shadow's bedded Controlled Round Push Feed action and free floating, target crowned barrel help ensure years of dependable accuracy, both off the bench and in the field. The one-piece bottom metal with hinged steel floorplate makes unloading easy. See charts beginning on page 52.

NEW

**MODEL 70
SHADOW ELITE, 375 H&H MAGNUM**

Non-fluted with sights, MAG

**MODEL 70
SHADOW ELITE, STAINLESS**

SA, LA

Feeling as good as it looks, the lightweight stock with rubberized, overmolded gripping surfaces and Dura-Touch® Armor Coating on the Shadow Elite Stainless comes to your shoulder naturally. The fluted barrel, action, floorplate and other internal components are stainless steel to withstand any weather, and the Controlled Round Feed action positively picks up every cartridge from the magazine and feeds it straight into the chamber. Available in popular long action calibers and all WSM chamberings. The highly-specialized 375 H&H Magnum features fold-down express sights and a heavy profile non-fluted barrel. See charts beginning on page 52.

**MODEL 70
SUPER SHADOW™, BLUED**

SSA, SA, LA

THE 2005 NRA GOLDEN BULLSEYE
"RIFLE OF THE YEAR" AWARD WINNER

Seasoned riflemen will appreciate the simple, flowing lines and stellar value of the Model 70 Super Shadow, while the technophiles will revel in its advanced reinforced composite stock construction, molded-in oval dot grip panels and weight-saving blind magazine. With the versatility of Controlled Round Push Feed, time-proven three-position safety and wide variety of action lengths and chamberings the Super Shadow has become the most popular composite-stocked Model 70 ever. See charts beginning on page 52.

More Model 70s go to Africa than any other rifle. As hunters, we are drawn. We are drawn to the regal herds that call the yellow plains of the Serengeti home. On your next stalk in the long grass after dangerous game, settle for nothing less than the absolute reliability of a Model 70 in your hands.

- Machined steel receiver
- One-piece all steel bottom metal
- Massive claw extractor
- Select walnut stock with steel crossbolts
- Pachmayr® Decelerator® recoil pad

Three-Position Safety. The three-position safety on the Model 70 has proven effective and highly popular with hunters and shooters for decades. Convenient to operate with the thumb of the firing hand, the Model 70 safety design doesn't just block trigger movement like those found on lesser rifles. When the safety selector is in the middle position, the action can still be operated, allowing unfired cartridges to be cycled with the safety on.

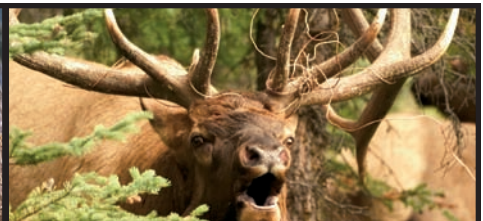

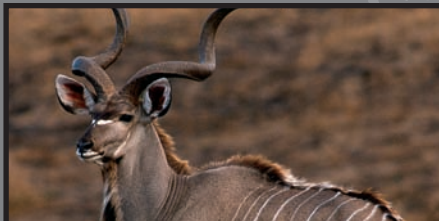

Blade-Type Ejector. A blade-type ejector allows you to have full control when ejecting a fired case. Pull the bolt back slowly and the empty pops out gently, perfect for target shooters and varminters. Pull the bolt back with vigor and the empty case clears the port with greater force. Once you see the case eject you know you can chamber the next cartridge, eliminating short-stroking malfunctions.

One-Piece Floorplate Frame/Trigger Guard. The one-piece floorplate and trigger guard design found on nearly all Model 70 rifles gives a clean, finished look while adding rigidity and strength to the action for correct floorplate and latch alignment and more consistent bottom metal-to-action attachment for greater accuracy.

Gold and Nickel Accents on polished blued steel highlight the tasteful engraving on the floorplate of the Model 70 Super Grade Centennial 30-06.

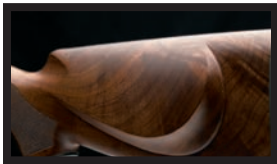

**MODEL 70
SUPER GRADE III, RMEF®
SA**

Grip cap medallion on the Model 70 Super Grade III, RMEF.

The shadowline cheekpiece on the Model 70 Super Grade puts your eye in perfect alignment behind the scope.

Available only in limited quantities, the Super Grade III Rocky Mountain Elk Foundation (RMEF) boasts a stainless steel receiver and barrel chambered for either the blistering 300 WSM or potent 325 WSM. The select walnut stock sports carefully cut checkering, a shadowline cheekpiece, black endcap, steel stock crossbolt, inletted swivel studs and a Pachmayr® Decelerator® recoil pad completing the package. A special grip cap medallion affirms that a portion of the proceeds from each rifle sold help the RMEF's efforts to preserve elk habitat. See charts beginning on page 52.

**MODEL 70
SUPER GRADE III, BLUED
SA, LA, MAG**

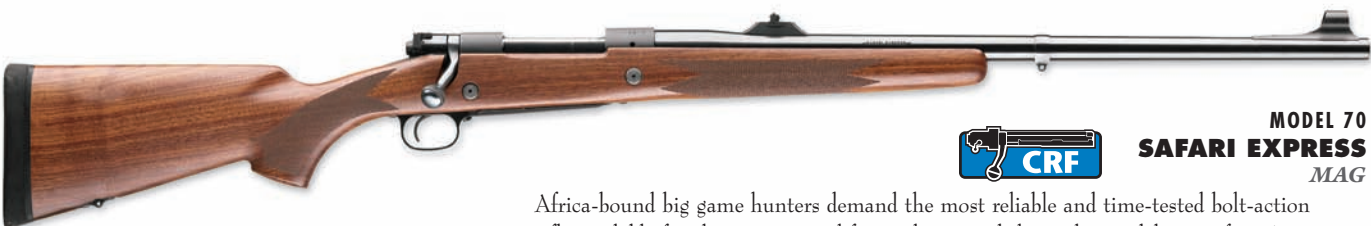

Today's Super Grade III features a trimmer, sporter-style select walnut stock with cut checkering, shadowline cheekpiece and Pachmayr® Decelerator® recoil pad for extra comfort. You'll appreciate the attention to small details like an etched steel stock crossbolt, black fore-end cap and swivel studs that are inletted for the custom look you'd expect on a rifle of this quality. The one-piece floorplate design adds rigidity to the Pre-'64 type Controlled Round Feed action. The short action version is scaled to optimize performance from all four WSM calibers. See charts beginning on page 52.

**MODEL 70
SUPER GRADE CENTENNIAL 30-06
LA**

Here's to another 100 years. For those who love the venerable 30-06 Springfield cartridge, the Model 70 Centennial 30-06 is your ideal rifle. It's a special Super Grade with a beautifully checkered walnut stock, black fore-end cap and single steel crossbolt housing a Controlled Round Feed action with engraved extractor, blue steel barrel and a polished, engraved floorplate sporting special gold and nickel enhancements. Only 306 of these magnificent rifles will be produced. See charts beginning on page 52.

**MODEL 70
SAFARI EXPRESS
MAG**

Second Recoil Lug helps resist the pounding of heavy African magnum cartridges on the Model 70 Safari Express.

Africa-bound big game hunters demand the most reliable and time-tested bolt-action rifle available for their once-in-a-lifetime hunt, and that's the Model 70 Safari Express. Comfortable to carry and quick to the shoulder, it's built with dual recoil lugs and a steel stock reinforcing crossbolt to handle the punishment from heavy stopping cartridges and provide you with legendary reliability when it's needed most. You'll appreciate important details like the Pre-'64 type claw extractor, Pachmayr® Decelerator® recoil pad, barrel band front swivel base, hooded front blade and express-style rear sight. 375 H&H Mag., 416 Rem. Mag. or 458 Win. Mag. calibers are available. See charts beginning on page 52.

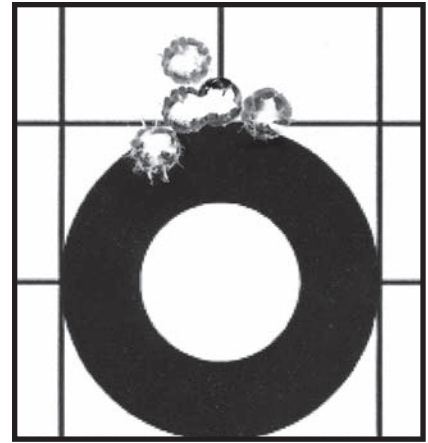

There is a reason the Model 70 is known as the "Rifleman's Rifle." Take a look at the Featherweight and Sporter III. No other gun embodies the character of these two rifles. Chamberings include everything from the high-velocity WSSMs, to standard long and short action calibers, and even the heavy-hitting WSM calibers. From the lighter weight barrel of the Featherweight to the now trimmer, traditional stock design of the Sporter, these rifles are the Guns That Work™.

- One-piece bottom metal with steel floorplate
- Classic walnut stock designs with cut checkering
- Left-hand models
- Pachmayr® Decelerator® recoil pad on all magnum models

Controlled Round Feed Bolt. If there were a single feature responsible for the Model 70 being labeled the "Bolt-Action Rifle of the Century," it would arguably be the classic Controlled Round Feed (CRF) bolt design. The massive claw extractor smoothly slips into and secures about one-quarter of the cartridge's base, exerting full control from the very moment it leaves the magazine and enters the chamber, then hangs on tight until it's fully ejected. This time-proven design allows an unfired cartridge to be extracted even if it is not yet fully chambered.

Tighten Your Group. Many competitor's bolt designs require the cartridge to be fully chambered before their extractor ever engages the extraction groove on the case. Until then, the unfired cartridge is just rattling along loose in front of the bolt as it moves forward, potentially deforming the bullet tip as it's chambered. A deformed bullet tip is often the cause of those unexplained fliers that make your group open up. At longer ranges such fliers could result in a missed trophy, or worse, a wounded game animal. It's just one more reason why the classic Model 70 bolt design has been a favorite of knowledgeable riflemen for 70 years.

**MODEL 70
FEATHERWEIGHT™, STAINLESS**
SSA, SA, LA

With the traditional cut checkering pattern and handsome Schnabel fore-end of the classic Featherweight, this flagship of the Model 70 line offers both beauty and performance with a weather-resistant stainless barrel, receiver and internal parts. While the looks of the new Featherweight quickly set it apart from the competition, don't overlook its time-proven three-position safety and extraordinary accuracy. The new Featherweight Stainless is chambered in all WSSM and WSM calibers as well as a variety of standard calibers. A Pachmayr® Decelerator® recoil pad is installed on the WSM models, while standard calibers include the traditional Winchester Model 70 recoil pad. See charts beginning on page 52.

**MODEL 70
SPORTER III, LEFT-HAND**
SA, LA

**MODEL 70
SPORTER III**
SA, LA

The handsome contours of the Sporter III stock include a sculpted cheekpiece for instant scope alignment. (Right-hand model shown.)

The Sporter III features a satin finished walnut stock with cut checkering on a trim fore-end and pistol grip, along with a sculpted cheekpiece for precise scope alignment to create a superbly balanced rifle that's lighter to carry. The Pachmayr® Decelerator® recoil pad with reduced contact area offers optimal protection against recoil while still being fast to the shoulder. Available in both right- and left-hand versions, in long and short action calibers and WSM calibers. The WSM models are built around a short action and slightly scaled-down stock (Scope not included.) See charts beginning on page 52.

**MODEL 70
FEATHERWEIGHT™, LEFT-HAND**
SSA, SA, LA

**MODEL 70
FEATHERWEIGHT™, BLUED**
SSA, SA, LA

The legendary handling and quickness of the Model 70 Featherweight is justly famous among hunters everywhere. The Model 70 action is highlighted by a jeweled bolt and knurled bolt handle. Like the original Featherweight, the angled comb walnut stock still features the Schnabel fore-end and satin finish with elegant cut checkering. It's available in both left- and right-hand models in the most popular long, short and super-short action calibers, including WSM and WSSM calibers. A Pachmayr® Decelerator® recoil pad is featured on WSM models, while other calibers include the standard Model 70 recoil pad. See charts beginning on page 52.

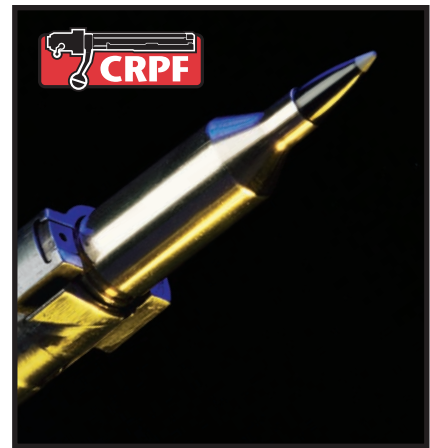

When the ranges are long and the targets small, reach for a Model 70 Coyote or Stealth II. Among the most accurate rifles available anywhere, the Coyotes are perfect for the avid varmint and target shooter wanting to wring the utmost accuracy out of their rifle. The Stealth II comes ready for extreme long-range action straight from the box.

- Controlled Round Push Feed for easy single-round loading
- Bedded actions and free floating barrels for exceptional long-range accuracy
- Highly-stable laminated and composite stocks

Controlled Round Push Feed Bolt. If you've ever wished for the sureness of the classic Controlled Round Feed (CRF) with the single-shot loading convenience of push feed bolt designs, the Controlled Round Push Feed bolt (CRPF) – available on selected Model 70 rifles – is your solution.

Innovative Extractor Design. Like the classic Controlled Round Feed design, this innovative extractor design secures a portion of the base of the cartridge when chambering for a straight insertion into the chamber, protecting the bullet point. It also allows for easy extraction, even if the cartridge is not fully chambered. As a push feed design, the CRPF extractor rides over the cartridge rim for easy direct-to-the-chamber single-shot loading. If you are a varmint hunter or target shooter, CRPF is the bolt design for you.

NEW

MODEL 70 LAMINATED COYOTE OUTBACK™, STAINLESS
SSA, SA, LA

There's never been a rifle that looks and performs like a Coyote Outback Stainless. The satin-finished gray laminated stock with extra bipod stud has been extensively lightened with flow-through cutaways in both the buttstock and fore-end areas, saving more than a pound of weight. A bedded matte-finished stainless receiver and medium-heavy, free floating fluted stainless barrel save even more weight, making the Outback easy to carry all day long across the roughest terrain found in your own favorite "outback." It's available in a full line of popular calibers, including WSM chamberings. See charts beginning on page 52.

**MODEL 70 LAMINATED
COYOTE, BROWN, STAINLESS**
SSA, SA

NEW

**MODEL 70 LAMINATED
COYOTE, GRAY, STAINLESS**
SA

If you're looking for a proven varmint rifle design that can double as a big game rifle, look no further than the Coyote Stainless. Capable of exceptional long-range accuracy, the Coyote pairs a 24" medium-heavy stainless barrel and blued steel receiver with, depending on the caliber, a rugged brown or gray laminated stock sporting a reverse taper fore-end that's perfect for a bipod, shooting sticks or sandbags. It's a great all-in-one rifle built for any situation and available in numerous standard short action, WSM and WSSM calibers. See charts beginning on page 52.

NEW

**MODEL 70
COYOTE LITE, STAINLESS**
SSA, SA

The Coyote Lite Stainless is the ultimate long-range hunting rifle, carefully pared of any unnecessary weight. The matte-blued receiver and medium-heavy 24" fluted stainless barrel mount into a skeletonized aluminum bedding block that is set in a lightweight carbon fiber/fiberglass composite Bell and Carlson™ stock for superb accuracy. Flow-through vents on the fore-end reduce weight and help cool the barrel during long strings of fire and a Pachmayr® Decelerator® pad helps soak up recoil. Available in standard short action and WSM calibers. The Coyote Lite is also available in a special all-blued model in all three WSSM calibers. (Scope not included.) See charts beginning on page 52.

**MODEL 70
STEALTH II, BLUED**
SSA, SA

The 2004 Guns & Ammo Magazine Rifle of the Year

When extreme long-range accuracy is required, reach for the heavyweight Stealth II varmint rifle. The non-glare, matte finished Bell and Carlson™ composite stock features a checkered pistol grip, Pachmayr® Decelerator® recoil pad and one-piece aluminum pillar block bedding for even greater accuracy. An additional front swivel stud for mounting both a sling and bipod is installed on the wide fore-end. A 26" heavy profile target barrel and one-piece alloy floorplate and trigger guard help to add mass and rigidity. The blade-type ejector allows you to precisely control ejection force, making fired brass recovery a snap. The Stealth II is available in all three WSSM calibers, plus 22-250 Rem. and 308 Win., and sets a new performance standard for demanding riflemen everywhere. See charts beginning on page 52.

Every hunter knows the value of a quick, effective follow-up shot on a tough-to-stop game animal. The new Super X Rifle (SXR) was conceived for just such situations. It's fast, smooth, powerful and accurate. It's ready and waiting to go afield after the most challenging big game. SXR. Welcome to the future.

- Fast gas-operated autoloader
- Bolt-action accuracy
- Available in standard and magnum calibers
- Removable trigger assembly
- Detachable box magazine
- International-styled walnut stock

Just when you thought you'd seen everything, along comes the new Super X Rifle (SXR™) from Winchester Rifles and Shotguns.

The SXR traces a proud autoloading heritage that includes the legendary M1 Garand, M14 and the great Model 100 rifle. Combining a modern gas-operated autoloading system and cutting edge international styling with solid reliability and accuracy, the SXR is ready to take on any shooting challenge, in the field or from the bench.

SXR™

NEW

SXR IS CHAMBERED IN FOUR GREAT HUNTING CARTRIDGES

270 WSM, 300 WSM, 30-06 Sprg. and 300 Win. Mag.

The new SXR™ is available in four great, big game cartridges. Check out the 270 WSM, a fast, flat-shooting round perfect for deer and antelope. If you prefer something with a century-long track record, the versatile 30-06 can't be beat. If you're going after even bigger game, consider getting your SXR in either the 300 WSM or 300 Win. Mag. Whatever your game, there is an SXR chambering suitable for the chase.

Reliable Gas System and Action. A one-piece aircraft-grade alloy receiver on the SXR houses the gas-operated action utilizing a multi-lug rotating bolt locking system. This very precise lock-up provides for bolt-action accuracy and allows powerful magnum cartridges to be chambered, something few other autoloading rifles are capable of. The SXR is reliable with virtually any bullet weight currently available in factory ammunition. The receiver is drilled and tapped for scope mounts to further capitalize on the SXR's extraordinary accuracy potential.

Detachable Box Magazine. Quick to both load and unload, the SXR uses a unique detachable box magazine. Simply depress the magazine release button located just in front of the trigger guard, remove the empty magazine, slip in a loaded one and you're ready. Additional loaded magazines can be carried in a pocket, keeping extra ammunition clean and dry, even in the worst weather.

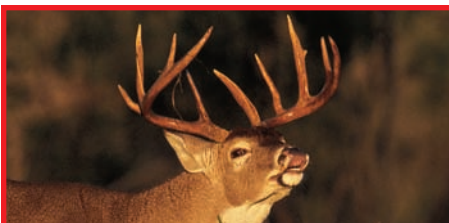

Modern Styling. The international styling of the SXR's stock makes a statement about the shooter who carries it. Reminiscent of modern sculpture, the checkered walnut stock on the SXR floats to the shoulder and puts you right on target. The bold red 'W' inset into the forearm leaves no uncertainty that this is the latest creation from Winchester Rifles and Shotguns.

**CENTERFIRE AUTOLOADER
SUPER X RIFLE**

The fastest follow-up shot is the one that loads itself, and the new SXR autoloader is among the fastest on the planet. From its strong, rigid alloy receiver to its hammer-forged barrel, the SXR stands ready to meet the challenge of any hunting situation. An enlarged trigger guard, crossbolt safety and smooth, single-stage trigger make the SXR easy to operate, even with gloved hands. The walnut stock gives a perfect fit and looks like a work of art. Today the SXR stands poised to become the choice of tomorrow's riflemen. See charts beginning on page 52.

HISTORIC 1885 & CENTENNIAL HUNTER

Nothing can be more representative of the opening of the American West and the early days of the Winchester Firearms brand than a single-shot rifle. They were the days of the great cattle drives, westbound wagon trains and herds of buffalo roaming the dusty plains. It was a time when men of courage and vision ... and their Winchester rifles led the way. They still do.

- Strong, machined steel receiver
- Crisp, adjustable trigger
- Simple, strong, reliable and accurate falling block design
- A proud sense of history only the Model 1885 single-shot can offer

100 Years of the 30-06 Springfield. In commemoration of a full century as America's favorite centerfire rifle cartridge, the 1885 High Wall Centennial Hunter sports a beautiful, gold-embellished 30-06 seal over polished blued steel on the right side of the receiver. A fine gold line surrounds and sets off the seal, creating a lasting tribute to the closing of one century and the opening of the next for this classic cartridge.

1906 - 2006 Celebrating 100 Years of 30-06 Springfield

**MODEL 1885
LOW WALL,
17 MACH 2™**

Like its big brother the 1885 High Wall, the Model 1885 Low Wall has an outstanding reputation for accuracy among those who favor one exacting shot. Today it's chambered in the fantastically accurate 17 Mach 2™, a 22 Long Rifle cartridge necked down to 17 caliber that speeds along up to 2,100 f.p.s. Lowering the lever after firing extracts the spent case, while a convenient ejector/selector switch allows you to either hold it captive for removal or eject it in any direction, making it a perfect solution for both left- and right-hand shooters. The gorgeous case-colored receiver, buttplate and lever, along with fine-line checkering help give this gem the classic looks to match its hot ballistics. The 1885 Low Wall has adjustable open sights and is drilled and tapped for scope mounts. See charts beginning on page 52.

**MODEL 1885
30-06 CENTENNIAL
HUNTER**

1906 to 2006 makes for 100 incredible years. The 30-06 Springfield, America's all-time favorite cartridge, is commemorating its first century and still going strong. As the 1885 High Wall was one of the first sporting rifles chambered in this cartridge, it seems appropriate it should be a part of the celebration. For 2006 the 1885 Centennial Hunter offers this chambering in a free-floating 28" full octagon barrel, drilled and tapped for scope mounts. A trim, satin finished checkered walnut stock complete with a premier Pachmayr® Decelerator® recoil pad, sling swivel studs and a Schnabel forearm frame this magnificent rifle, one that is sure to become a favorite companion on future hunts and cherished by future generations. See charts beginning on page 52.

**MODEL 1885
HIGH WALL HUNTER**

The Model 1885 has been chambered in more calibers than any other rifle in history, simply because the falling block design is the strongest, most time-tested and accurate action ever invented. This year the High Wall Hunter is chambered in both 223 Rem. and 22-250 Rem., along with the searing 270 WSM, 7mm WSM, 300 WSM and 325 WSM. The compact receiver features an authentic, long top-tang and free-floating 28" full octagon barrel without sights and is drilled and tapped for scope mounts. The premier Pachmayr® Decelerator® recoil pad is carefully fitted to a walnut stock sporting a classic Schnabel forearm. The crisp trigger is fully adjustable. Pick up a Model 1885 and understand why hunters and marksmen who demand one perfect shot have cherished this rifle for more than 125 years. See charts beginning on page 52.

Few rifles can boast the combination of looks, hardworking performance and reliability of the Model 94 — not to mention its rich, nostalgic, history. For over 100 years, this ageless model has been a mainstay of cowboys, ranchers, hunters and shooters.

- Reliable, strong, affordable centerfire shooting
- More Model 94 options and calibers than ever before
- Top-tang safety
- Angle ejection
- Uncommon accuracy

TAKE DOWN 94

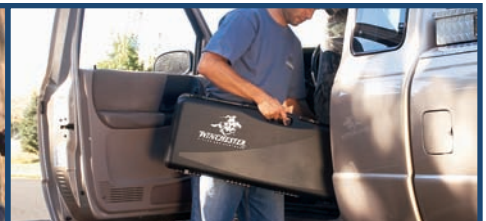

OPEN.

Ever wish you had a rifle when you didn't? With the new Takedown Model 94, you have no reason to not have a rifle nearby. It's easy to haul in a pickup, ATV or bush plane and its unique, adjustable receiver-to-barrel interface insures tight accuracy and fast handling. It packs easily for travel. Inspired by the first Takedown issued in February of 1895, there are three new model 94s in seven calibers available in a small package of game-getting power. No rifle? No excuse.

M 94

**MODEL 94 TD
SHORT HUNTER**

The new Short Hunter Takedown is a fast-handling, compact rifle with an 18" barrel, full-length magazine, blued receiver and forearm cap. A unique, scaled-down XS® brand ghost-ring sight has a thin front blade and small rear aperture for a very precise sight picture. Total length when taken down is less than 20". Calibers include the 450 Marlin, 44 Rem. Mag. and the 30-30 Win. See charts beginning on page 52.

**MODEL 94 TD
TIMBER SCOUT**

One of the most innovative, exciting Model 94s to roll off the line in many years, is now available in a new Takedown model for easy, compact transport. The Timber Scout Takedown has a wide field of view for fast, continuous target acquisition and fast follow-up shots, using a long eye-relief scope with quick-detachable mounts which are easily mounted to the attached rail/base. The walnut stock has checkering on the semi-pistol grip and forearm, along with a blued steel end cap. It's also supplied with premier XS® brand ghost-ring sights. Pure performance. In calibers 30-30 Win., 44 Rem. Mag. and 450 Marlin. See charts beginning on page 52.

**MODEL 94 TD
TRAILS END™**

The new Trails End Takedown with a 20" round barrel is compact to carry, easy to pack and quick to assemble. It features a blued finish on the barrel and receiver, a straight buttplate and an extended forearm with a Marble's® front sight with gold bead. The stock is satin-finished walnut with a top-tang safety, drilled and tapped for a scope with a hammer spur extension included. It's offered in 357 Mag., 38-55 Win., 45 Colt, 44 Rem. Mag., 30-30 Win., and 25-35 Win. See charts beginning on page 52.

MODEL 94 HUNTING

The Model 94 lends itself well to many different styles, calibers and configurations. Offerings for 2006 have never been greater in this most versatile of all lever-actions. There must be something said about a rifle whose basic design and action have not changed in over 110 years and which has been in continual production since its inception. If you're an avid hunter, shooter, or rancher, it would be a shame not to have a Model 94 as part of your firearm collection.

**MODEL 94
TIMBER**

The Timber is a compact, carbine-style rifle designed to be supremely fast and maneuverable, and deliver an enormous punch. Chambered in 450 Marlin, it features a quick-swinging 18" ported barrel. Fully adjustable XS® brand ghost-ring sights provide quick target acquisition and excellent accuracy. The checkered stock features a semi-pistol grip design and the three-quarter magazine holds four rounds. A Pachmayr® Decelerator® recoil pad helps reduce recoil. The receiver is drilled and tapped for scope mounts. Designed for hunting the biggest and the baddest game. See charts beginning on page 52.

**MODEL 94
TIMBER SCOUT**

The Timber Scout is designed for fast and continuous target acquisition, allowing a wide field of view for fast follow-up shots. The rail/base mounted on the nimble 18" barrel is perfect for a long eye relief scope with quick-detachable mounts, allowing you to shoot with both eyes open. Remove the scope in inclement weather, or when light conditions fade, and utilize the XS® brand ghost-ring sights. The Timber Scout is the ideal fast-action rifle in heavy cover for deer, elk or hogs. Drilled and tapped for scope mounts. (Scope not included.) See charts beginning on page 52.

**MODEL 94
LEGACY BLUED OCTAGON, 26"**

**MODEL 94
LEGACY CASE-COLORED
OCTAGON, 26"**

**MODEL 94
LEGACY ROUND, 26"**

**MODEL 94
LEGACY CASE-COLORED
ROUND, 26"**

Throughout the years, one Model 94 stands out from the rest. The timeless, elegant Legacy is certainly one of the finest Model 94s in one of the most classic configurations of the past. It features an octagon or round 26" barrel, a finely checkered walnut stock and long-style forearm, an adjustable Marble's® rear tang sight and the option of a case-colored or richly blued steel receiver. Notice the nostalgic curved buttplate, preferred by cowboys and range riders for more than 100 years. Chamberings are in 30-30 Win. or 38-55 Win. Each rifle has been carefully designed for comfortable balance and accurate shooting. Drilled and tapped for scope mounts. See charts beginning on page 52.

**MODEL 94
ORIGINAL LEGACY, 24"**

This Legacy distinguishes itself with a nicely finished American walnut stock with cut checkering and semi-pistol grip for a classic fit and smart handling. The stock provides a superb fit when using a scope. A longer forearm allows a more forward hand position to nicely balance the 24" barrel. A full-length magazine and top-tang safety improve the Legacy's already great looks. Select from calibers 30-30 Win., 357 Mag., 44 Rem. Mag. or 45 Colt. Drilled and tapped for scope mounts. Hammer spur extension included. See charts beginning on page 52.

MODEL 94 TRAILS END™

Because Model 94s have always shouldered and pointed instinctively and cycled with authority, there has been little need over the years for customizing of stocks and forearms.

A Model 94 Trails End comes to the shoulder like a hammer to a blacksmith's grip, a naturally fitting tool of confident familiarity. It can be as fast as you need it to be, dependable, accurate and always ready. Today's Model 94s are better than ever. Make a legendary Winchester firearm one of your sidekicks.

**MODEL 94
TRAILS END CASE-COLORED
20" OCTAGON**

**MODEL 94
TRAILS END BLUED
20" OCTAGON**

**MODEL 94
ORIGINAL TRAILS END
BLUED 20" ROUND**

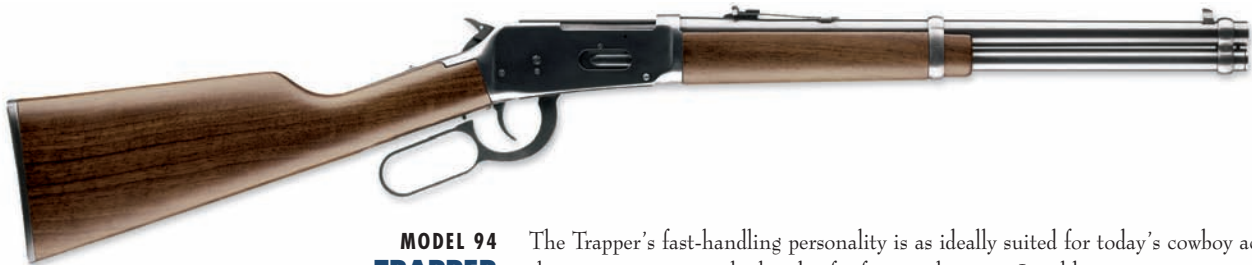

Come along to the Trails End series. Never before has the Model 94 been dressed so elegantly. The Octagon model has an octagon barrel, Marble's® front sight with gold bead and choice of a blued or case-colored receiver, lever, forearm cap and crescent buttplate. The original round barrel features a blued receiver, a straight buttplate and an extended forearm that provides forward hand position for better balance. All feature a 20" barrel and are chambered in six great calibers: 25-35 Win., 30-30 Win., 38-55 Win., 357 Mag., 44 Rem. Mag. and 45 Colt. Other features include satin-finished walnut stocks, top-tang safeties, drilled and tapped receivers and hammer spur extensions for use with a scope.

See charts beginning on page 52.

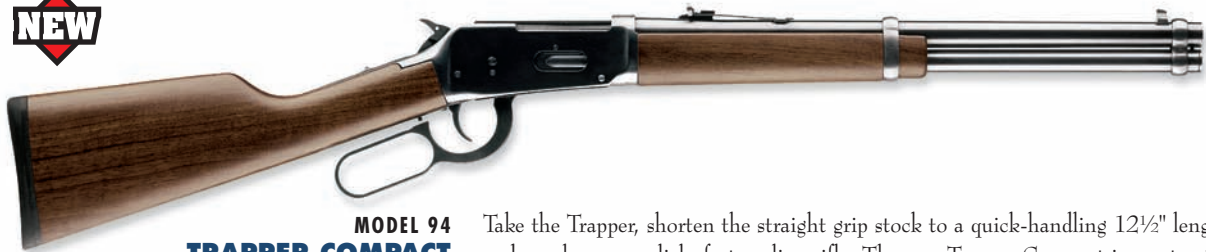

M 94

MODEL 94 TRAPPER

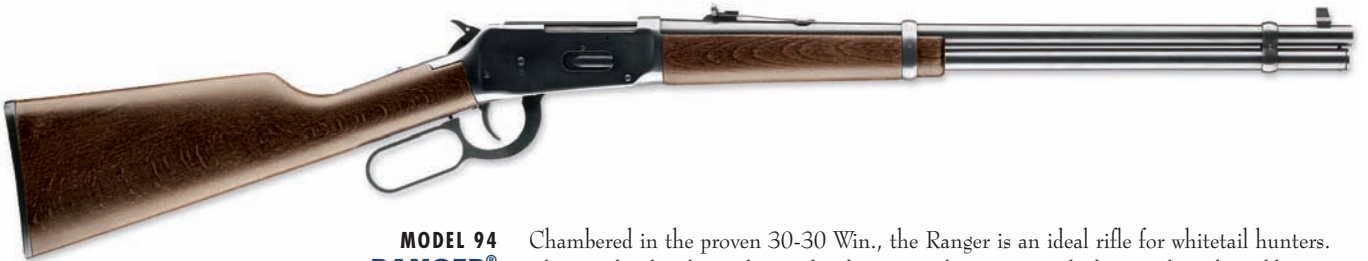

The Trapper's fast-handling personality is as ideally suited for today's cowboy action shooting as it was in the hands of a frontier lawman. Just like a century ago, you'll appreciate the quick 16" barrel and the rifle's overall carbine-style portability when hunting in heavy cover or carrying your Trapper on a backpack, horse or an ATV. The top-tang safety brings back the original look of the classic Model 94. Take your pick from 357 Mag., 44 Rem. Mag., 45 Colt or 30-30 Win. A saddle ring and hammer spur extension are included. See charts beginning on page 52.

NEW

MODEL 94 TRAPPER COMPACT

Take the Trapper, shorten the straight grip stock to a quick-handling 12½" length of pull, and you have one slick, fast-cycling rifle. The new Trapper Compact is most suitable for smaller-framed shooters. The barrel is 16" long, making it easy to carry and maneuver through heavy cover. It's easy to pack along just about anywhere. The two-position, top-tang safety is easy to see and operate. Chambered in 357 Mag. with a rubber butt pad for comfortable recoil. A saddle ring and hammer spur extension are included and it's drilled and tapped for scope mounts. See charts beginning on page 52.

MODEL 94 RANGER®

Chambered in the proven 30-30 Win., the Ranger is an ideal rifle for whitetail hunters. This is a hardworking, day-to-day firearm. It has a post-style front sight, adjustable rear sight, a durable hardwood stock and forearm and top-tang safety. The Ranger is perfectly balanced, making it shoot amazingly well. A hammer spur extension is included for use with a scope. See charts beginning on page 52.

MODEL 9422 TRIBUTE

Right side of the High Grade Legacy.

Left side of the High Grade Legacy.

*R*imfire rifles have always held special places in the hearts of gun owners for many reasons.

The Model 9422 has been one of the best loved 22 rimfires. It's now time to say farewell to this fine little lever-action. Each rifle is a tribute to the legacy of the Model 9422. If you have been a devoted Winchester fan, now is the time to make one of these 22 rifles your own.

- These models will never again be available
- Very few remain
- Most classic lever-action rimfire of all time
- An honored tribute to a well-respected rifle

Top: Right side of the High Grade Legacy. Bottom: Left side of the Special Edition Traditional Tribute.

**MODEL 9422
SPECIAL EDITION LEGACY TRIBUTE**

The Special Edition Legacy Tribute Model 9422 gives you a unique opportunity to own a rare, fine shooting 22 with elegant looks that will be admired for years to come. This model resembles the centerfire Model 94, featuring a high grade pistol grip walnut stock and forearm, carefully checkered. The deeply blued receiver is delicately engraved with a tribute to the 9422 and the traditional Winchester® Horse and Rider. The 22½" barrel provides just the right balance. The front sight hood is removable and a hammer extension is included for use with a scope. Choose from 22 Long Rifle or 22 WMR. Limited quantities remain. See charts beginning on page 52.

**MODEL 9422
SPECIAL EDITION TRADITIONAL TRIBUTE**

The Special Edition Traditional Tribute Model 9422 maintains the smooth, reliable action and excellent finish work of Winchester rimfire rifles, which made them the standard of quality for more than 30 years. The Traditional is quite possibly the ultimate hunting rifle for squirrels and other small game. It features a checkered straight grip, satin-finished walnut stock and forearm. The deeply blued receiver is engraved with a tribute to the 9422 and the traditional Winchester Horse and Rider. A removable front sight hood and hammer extension are included. Limited quantities available. Select either 22 Long Rifle or 22 WMR. See charts beginning on page 52.

**MODEL 9422
HIGH GRADE LEGACY TRIBUTE**

The Model 9422 High Grade Legacy Tribute has a nostalgic appeal. It has a high grade, cut-checkered, semi-pistol grip walnut stock and forearm with extended nose for a more forward position. The richly blued receiver is delicately engraved with silver-enhanced scenes (above left), making this rifle very unique. A 22½" barrel balances just right. The rear sights are adjustable and the front sight hood is removable. A hammer extension is included for use with a scope. 22 Long Rifle or 22 WMR. See charts beginning on page 52.

**MODEL 9422
HIGH GRADE TRADITIONAL TRIBUTE**

If you are looking for a fine shooting, collectible Model 9422, the High Grade Traditional Tribute is your rifle. Deluxe, fine checkering wraps around the beautiful high grade walnut stock and forearm, while the high-relief silver inlay engraving of the 9422 tribute and Winchester Horse and Rider (above left) enhance the deeply blued receiver. For looks it will be hard to top the High Grade Traditional. In addition to its beauty, the High Grade Traditional still features its renowned reliability, handling and extreme accuracy. Available in either a 22 Long Rifle or 22 WMR. See charts beginning on page 52.

9422

MODEL 9410 SHOTGUN

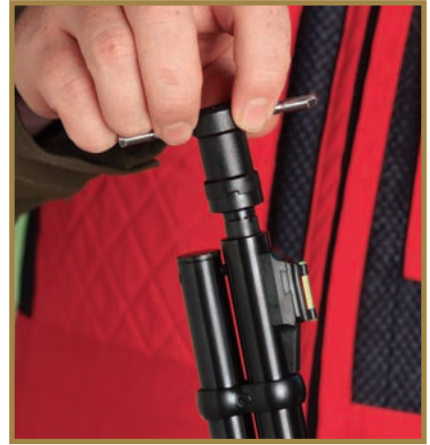

Few shotguns hold the allure of the Model 9410, a sweet lever-action chambering the .410 bore shotshell. From early season dove fields, to the biting cold of late winter rabbit hunts, to a spring day shooting clay targets, the Model 9410 is meant to be enjoyed all year long. Featuring the tried and true Model 94 lever-action, the 9410 positively loads and ejects each round quickly and smoothly, providing instant follow-up shots. The 9410 is available in a variety of models with the interchangeable Invector™ choke system, which adds versatility to your shot patterns.

- Invector™ choke tube system
- TRUGLO® fiber-optic front sight
- The Packer Compact has smaller dimensions

Fiber-optic sight systems allow for increased muzzle awareness and faster target acquisition.

TRUGLO

Choose your patterns. With the Invector™ choke tube system, you can tailor the shot pattern to meet your needs — be it tight, full choke patterns for tree squirrels or shooting slugs at larger varmints. The Invector system is a definite advantage.

**MODEL 9410
TRADITIONAL**
TRUGLO

The Model 9410 Traditional shotgun's straight grip stock and top-tang safety bring back the look and feel of the original Model 1894s. The Traditional is designed with the kind of handling and pointability necessary when hunting fast-moving game. The 24" barrel, with interchangeable Invector™ chokes, readily handles all current factory 2½" .410 bore shotgun loads, including Foster-type rifled slugs for larger varmints. A modified shallow "V" adjustable rear sight is paired with a fiber-optic TRUGLO® front sight for fast target acquisition. See charts beginning on page 52.

**MODEL 9410
PACKER COMPACT**
TRUGLO

Combine reduced stock dimensions (12½" length of pull) with light weight and low recoil, and the Model 9410 Packer Compact becomes the perfect first gun, especially for younger or smaller shooters. All the features found on the full-size models are here: TRUGLO® fiber-optic front sight with modified shallow "V" adjustable rear sight, walnut stock and forearm, and a distinctive end-cap. In addition, you'll appreciate the Invector™ choke system which provides any shot pattern you want. The top-tang safety is conveniently placed and easy for smaller hands to operate. See charts beginning on page 52.

**MODEL 9410
PACKER**
TRUGLO

The Model 9410 Packer is the perfect do-it-all gun. Lightweight and immensely fun to shoot, the Packer features a three-quarter magazine and 20" barrel equipped with the versatile Invector™ choke system. Use the Improved Cylinder choke for Foster-type rifled slugs for hunting larger varmints. The solid walnut stock and forearm with distinctive end-cap adds to its beauty. The metal TRUGLO® fiber-optic front sight combines with a modified shallow "V" adjustable rear sight for rapid target acquisition. Sling swivel bases are included. See charts beginning on page 52.

**MODEL 9410
RANGER®**
TRUGLO

The Model 9410 Ranger is the award-winning Model 9410 Traditional in a value priced, feature-packed Ranger version. The reliable action and 24" smoothbore barrel readily fire all factory 2½" .410 bore shotgun loads, including Foster-type rifled slugs. The full-length tubular magazine allows for a nine-shot capacity. The cylinder bore choke produces excellent mid-range patterns. A straight grip stock makes it fast to the shoulder, and the metal TRUGLO® fiber-optic front sight and modified shallow "V" adjustable rear sight make it easy to pick up targets. The top-tang safety maintains a classic appearance. See charts beginning on page 52.

Get energized. Toe the line at the shooting range with a confidence you've never felt before with a Winchester Select Energy. You simply won't find an over and under shotgun that provides the same levels of craftsmanship and value anywhere else.

- Super-low profile receiver with dual locking lugs and a fixed third lug underneath the receiver
- Deluxe recoil pad with snag-free heel
- Adjustable trigger shoe customizes length of pull
- Lightweight profile, .742" Back-Bored Technology barrel for optimum shot performance
- Innovative oval checkering for a consistent, secure grip
- TRUGLO® fiber-optic sight with five interchangeable inserts

Signature™ Choke tubes. A complete new line of deluxe, extended high-grade Invector-Plus™ choke tubes for the patterns you need. Ten different constrictions. (Available separately. See charts on page 55.)

Every Select Energy comes with a durable hard case imprinted with the Winchester Horse and Rider.

SELECT ENERGY TRAP
TRUGLO

Perfection on the trap range is closer than ever with the Select Energy Trap. Just bring this fine shotgun to your shoulder and see for yourself. The right-hand palm swell and oval checkering provide a secure, comfortable grip and the Monte Carlo stock effortlessly aligns your eye with the wide, 13mm runway rib. A TRUGLO® TRU-BEAD® front sight with five, colored fiber-optics pair with the mid-bead to acquire clays instantly. Lightweight profile barrels swing fast and porting tames recoil. The Invector-Plus™ choke system and .742" Back-Bored Technology barrels provide tight, consistent patterns. 30" or 32" polished blued barrels are available. See charts beginning on page 52.

SELECT ENERGY TRAP ADJUSTABLE COMB
TRUGLO

The Select Energy Trap includes many sought-after features right from the box. Most notably is the buttstock with a right-hand palm swell and adjustable comb that allows individual height and cast on/off customization in seconds. A wide 13mm runway rib, mid-bead sight and TRUGLO® TRU-BEAD® interchangeable fiber-optic front sight make busting clays a breeze. The lightweight barrels are highly polished and feature porting and vented side ribs. An adjustable trigger shoe fine tunes length of pull. Available with 30" or 32" barrels. See charts beginning on page 52.

SELECT ENERGY SPORTING ADJUSTABLE COMB
TRUGLO

The Select Energy Sporting, with its easily adjustable comb, is certain to make your shooting more accurate and comfortable. A long list of top features are included, like the Invector-Plus choke system that provides optimum shot patterns, lightweight ported barrels for recoil reduction for shooting comfort, and an adjustable trigger for tuning length of pull. Your choice of 28" to 32" barrel lengths with a 10mm rib and TRUGLO® TRU-BEAD® competition front sight round out this feature-packed shotgun. See charts beginning on page 52.

SELECT ENERGY SPORTING
TRUGLO

The Select Energy Sporting instills confidence with extraordinary balance and fit. Highly-polished, ported barrels with vented side ribs offer reduced recoil for more control, quick handling and a fast swing. You'll appreciate the looks and feel of the distinctive oval checkering on the walnut stock and forearm. A TRUGLO® TRU-BEAD® competition front sight with five, colored fiber-optic inserts and a mid-bead on the 10mm rib pick up clays instantly. Select 28", 30" or 32" barrels. .742" Back-Bored Technology and the Invector-Plus choke system is standard. See charts beginning on page 52.

Tradition starts here. Endless fields of corn stubble, a cool north breeze and a sturdy pointer are the perfect companions to a Winchester Select. These fine field guns blend traditional touches with modern Belgian craftsmanship like low-profile receivers, .742" Back-Bored Technology, a low rib and intricate engraving to create a gun you'll be proud to own and pass on to the next generation. Centralized balance and a quick, fluid swing come at no extra charge.

- Super-low profile receiver with strong dual locking lugs and a fixed third lug underneath the receiver
- Deluxe recoil pad with snag-free heel
- Beautiful high-relief receiver engraving for a classic appearance
- Lightweight profile, .742" Back-Bored barrels
- Traditional low-profile rib

Like you, a Select feels at home in the field. Perfect balance and dialed dimensions bring the Select to your shoulder rapidly for fast target acquisition. The strong locking mechanism ensures performance season after season. And it's impossible to overlook the traditional engraving style that increases the sophistication of these value packed guns.

Handsome engravings of game bird scenes adorn every Select field gun. To accentuate the delicate artwork on the silver nitride receivers, each line is lightly inked to increase contrast and allow the engraving to stand out. The Midnight model (shown below) takes this embellishment to a higher level, adding just a touch of gold to accentuate the scene.

Select Midnight Engraving. (Right side)

Select Midnight Engraving. (Left and bottom)

Every Select Energy, Midnight and Elegance shotgun (except White Field models) comes with a durable hard case imprinted with the Winchester Horse and Rider.

NEW

**SELECT
MIDNIGHT**

With elegant high-gloss bluing on both the receiver and barrels, this new Select looks as black as midnight. On a backdrop of extensive engraving are gold accented game birds, gracing both sides and the bottom of the receiver. Handsome satin-finished Grade II/III walnut adds to the high-quality look and feel of the Midnight. The unique oval checkering pattern enhances grip beyond traditional styles and adds a distinct appearance you'll appreciate for years to come. Precise stock dimensions coupled with the low-profile of the receiver put you on target quickly and, together with a deluxe recoil pad, keep recoil a controlled affair. Lightweight barrels reduce weight and swing fast. Choose from 26" or 28" barrels. See charts beginning on page 52.

NEW

**SELECT
WHITE FIELD, TRADITIONAL**

NEW

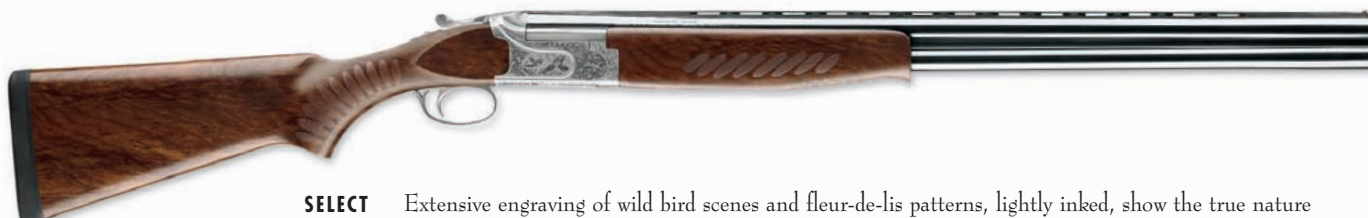

**SELECT
WHITE FIELD, EXTREME**

With a new Select White Field Extreme, you'll experience the handling you would expect from a pricey over and under, without the expense. The White Field is built with the same lasting integrity as other Select shotguns with an engraved silver nitride receiver. Oval-style checkering adorns the Extreme model, while the Traditional's checkering is just that, traditional. The lightweight profile barrels swing fast and fit precisely with the low-profile receiver. The Invector-Plus™ choke system keeps the shot pattern you need right in your pocket. With a White Field, the spirit of the over and under field gun is very much alive, and has never been so affordable. Your choice of 26" or 28" barrels. See charts beginning on page 52.

**SELECT
TRADITIONAL ELEGANCE**

Here is an over and under that you'll be proud to own and anxious to shoot, season after season. The engraved trigger guard and receiver feature game birds adorning the sides and bottom — a small part of the beauty found in the Select Traditional Elegance. Each line is lightly inked to enhance the engraving and fleur-de-lis borders. Stock checkering is traditional for a classic look. A deluxe recoil pad provides all-day recoil absorption. You'll immediately notice how the Traditional Elegance comes naturally to the shoulder, the low receiver profile and lightweight barrel contour providing centered balance for a smooth swing. 26" or 28" barrels are available. See charts beginning on page 52.

**SELECT
EXTREME ELEGANCE**

Extensive engraving of wild bird scenes and fleur-de-lis patterns, lightly inked, show the true nature of this shotgun and give credence to its name. In addition to its appearance, the Extreme Elegance is sure to capture the heart of every bird hunter with a low-profile receiver and lightweight barrel contours providing lightning-fast handling. Oval cut checkering enhances grip beyond traditional styles and adds a distinct appearance. The dual, tapered locking lugs, aided by a third, fixed lug mean strength on the inside and unbridled confidence on the outside. Choose from 26" or 28" barrels. See charts beginning on page 52.

SELECT

SUPER X3 FIELD

The next era of Winchester autoloading shotguns.

Winchester Firearms is respected for producing reliable, good looking, top performing shotguns. Our latest Super X3 models are no different. The self-adjusting Active Valve ensures speed, recoil reduction and durability in all conditions. An entirely new look with flowing lines adds a modern flare. Shoulder a Super X3 to feel the future of Winchester Firearms.

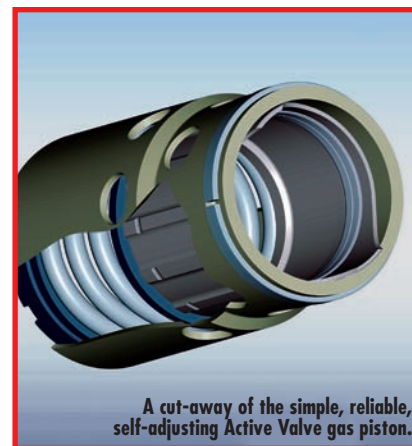

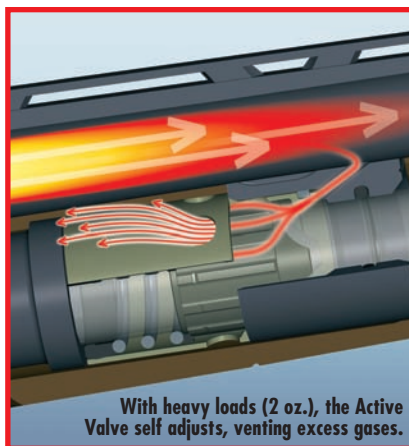

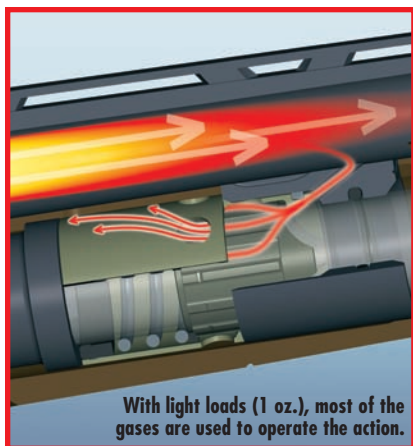

- Self-adjusting Active Valve provides world-class performance, firing five shells in about a half second
- New patented next generation Pachmayr® Decelerator® pad absorbs recoil, and the hard heel insert provides a slick surface that won't grab clothing when shouldering
- Length of pull is easily customized
- Lightweight alloy magazine tube and recoil spring system trims weight by half a pound

Feel it for yourself. The bold new look of the Super X3 is more than just aesthetic. The stock, grip and forearm dimensions are slimmer for a lighter, more controlled feel. Contributing to the feeling of lightness is an ultralight alloy magazine tube and recoil spring system that removes a half pound of weight. The new lightweight barrel further reduces weight with a narrow profile and a machined rib. Inside the barrel you'll find .742" Back-Bored Technology for the ideal combination of shot uniformity and velocity. The new gunmetal grey Perma-Cote™ UT (Ultra Tough) finish is more durable than traditional blueing. In fact, it is the toughest finish ever applied to a shotgun. Best of all, the centered balance and superior fit Winchester shotguns are renowned for remains intact.

Easy length of pull adjustments. Spacers are easily added or removed between the stock and recoil pad to customize your gun to your exact dimensions. Using spacers, stock length can be adjusted between 13³/₈" and 14³/₈" on wood stocks and 14¹/₄" and 14³/₄" on composite stocks.

The Active Valve System. The Super X3 has been refined to produce the most reliable, fastest shooting and softest recoiling autoloader available. This simple system consists of a gas piston with an internal Active Valve that self-adjusts to reliably fire a wide range of loads. With light loads, most of the gases from the fired shell are used to operate the action. With heavy loads, excess gases are vented from the piston.

The gas piston and Active Valve operate independently, exerting less pressure on the piston for greater longevity and efficiency than other gas-operated autoloaders. The extremely short piston stroke also limits the amount of combustion gases that get into the receiver for cleaner, more reliable operation. 3" models fire everything from light, 1 oz., 2¾" target loads to 3" magnums, while 3½" guns handle loads from 1½ oz., 2¾" field loads up to heavy 3½" magnums.

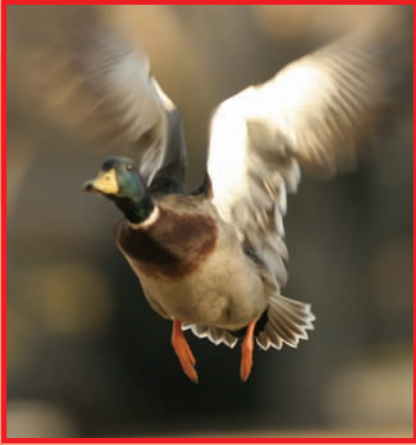

Bold new looks and innovative features make the new Winchester Super X3 Field a beautiful sight to behold and a force to be reckoned with. At a scant 6½ lbs., thanks to a weight-saving magazine tube and recoil spring system, slim barrel with a machined rib, and an alloy receiver, the 3" chambered SX3 Field has all the features you want in a field gun — or a sporting gun for that matter. The self-adjusting Active Valve gas system reduces recoil significantly more than recoil-operated systems and a new, proprietary next generation Pachmayr® Decelerator® recoil pad is fitted to further increase shooting comfort. Trim grip and forearm dimensions add to the lightweight, fast handling feeling. The .742" Back-Bored Technology and Invector-Plus™ choke tube system work together to provide perfect patterns. A unique gunmetal grey Perma-Cote UT (Ultra Tough) surface finish is applied to external surfaces for extreme corrosion protection. This is one shotgun you must experience to believe. See charts beginning on page 52.

SX3

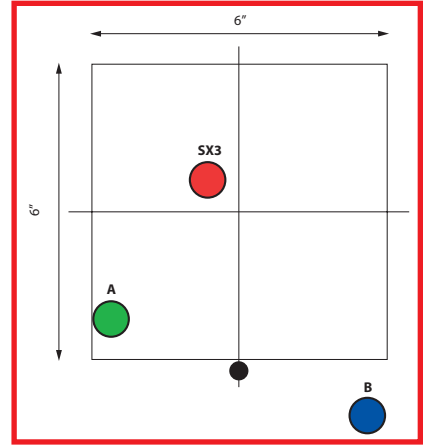

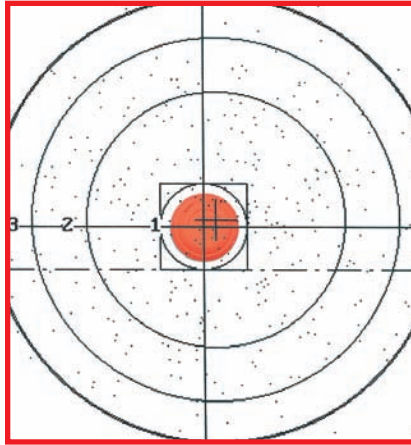

SUPER X3 COMPOSITE

Durability. The Super X3 mechanism has undergone testing where a total of 5,000 rounds were fired without a single malfunction. Ammunition and other conditions can affect results, but 5,000 rounds under any conditions is extraordinary and reaffirms the integrity and durability of the new Winchester Super X3 design.

- Exclusive Perma-Cote™ UT (Ultra Tough) finish on the receiver and barrel provide superior durability and protection from the elements
- .742" Back-Bored Technology combined with the Invector-Plus™ choke tube system provide optimum shot patterning and velocity
- Length of pull is easily customized

A winning combination. .742" Back-Bored Technology and the Invector-Plus™ choke tube system are standard on every Super X3 shotgun. Together, these two technologies provide the best ballistic results of any autoloading shotgun. You get a more accurate point of impact, denser, more uniform shot patterns and consistent shot velocity. The target above was shot at 38 yards with a Full choke. 80% of the pellets hit the 11⁵/₈" square target.

Great shot patterns are virtually meaningless if your shotgun can't shoot where you point it, which is why you'll hit more targets with a Winchester shotgun. As shown above, point of impact tests with the Super X3 (red) outclassed the competition (green and blue) in a very big way. (Approximate target size is 6" x 6".)

Quadra-Vent™ forward ducting system. This improved design facilitates more efficient bleeding of excess gases forward, away from the shooter. This is a special advantage when shooting heavy 3¹/₂" loads where the Active Valve System regulates bolt speed by venting off additional gases through the piston.

Perma-Cote™ UT Finish. UT stands for Ultra Tough. The unique gunmetal grey color of the new SX3 is a heavy-duty finish that not only looks incredible, it is also extremely durable and scratch-resistant for years of sharp-looking performance. Speaking of years, Perma-Cote UT is extremely corrosion-resistant to stand up to conditions that can make other guns disappear.

The next generation Pachmayr® Decelerator®. This patented new recoil pad comes standard on every Super X3 shotgun. The top of the pad features a proprietary hard heel insert for a smooth, snag-free surface that won't catch on clothing when shouldering, and does not reduce recoil-absorbing effectiveness. This ultra-soft pad absorbs recoil like no other.

Fine tune cast and drop. All Super X3 Composite shotguns feature stock spacers to adjust drop and cast over a ¼" range for a customized fit. The spacers fit between the stock and receiver to lock in your personalized dimensions.

**SUPER X3
COMPOSITE**
DURA-TOUCH®
Armor Coating
ACTIVE VALVE
system

Virtually nothing stops the new Winchester Super X3 Composite. An all new composite stock and forearm design features hot looks and trim dimensions that feel great in your hands, with Dura-Touch® added to provide a sure grip in any weather conditions. A gunmetal grey Perma-Cote UT (Ultra Tough) surface finish is applied to external surfaces for extreme corrosion protection. At around 6½ lbs., the SX3 Composite is one of the lightest autoloaders on the market. A weight-saving alloy magazine tube and recoil spring system, slim barrel with a machined rib, and an alloy receiver contribute to the low weight. The self-adjusting Active Valve gas system reduces recoil significantly more than recoil-operated systems and a new, proprietary next generation Pachmayr® Decelerator® recoil pad further increases shooting comfort. True point of impact and .742" Back-Bored Technology works with the Invector-Plus™ choke tube system to provide consistent hitting, dense patterns. 3" and 3½" chambered versions are available. See charts beginning on page 52.

Count on the Super X3 to reliably cycle everything from light target loads to heavy magnums.

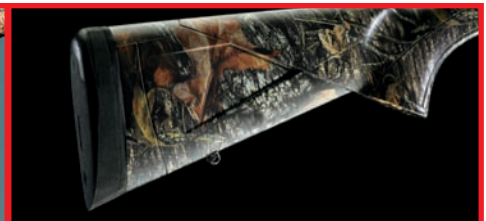

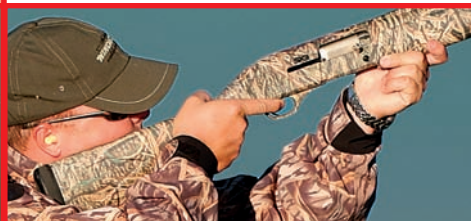

SX3

The new Super X3 is ready to hunt as hard as you do. Whether it's walking endless grain fields, slogging through marshlands or chilling out in a treestand, you can count on the SX3 to be there when you need it most. The SX3 blends the proven technology of our Active Valve™ gas system with updated features and distinctive styling to create a line of autoloaders that are ready for any hunting challenge — as you've come to expect from all Winchester firearms.

Welcome to the wetlands. Unlike you, the SX3 is impervious to extreme cold and shrugs off water thanks to the Dura-Touch® Armor Coating. The all new stock and forearm feature contours that enhance the effectiveness of the camouflage, and make a normally bland camo gun look awesome. The slender stock and forearm dimensions improve feel, especially with heavy gloves.

- Ultra-fast Active Valve reduces recoil and is unaffected by extreme heat or cold
- In-molded stock texturing and non-slip Dura-Touch Armor Coating provide a secure grip in all weather conditions
- Mossy Oak® camouflage patterns
- Length of pull is easily customized

Quadra-Vent™ forward ducting system.

This improved design facilitates more efficient bleeding of excess gases forward, away from the shooter. This is a special advantage when shooting heavy 3½" loads where the Winchester Active Valve system regulates bolt speed by venting off additional gases through the piston.

**SUPER X3
WATERFOWL**

When the geese are setting in, the new Super X3 Waterfowl 3½" in Mossy Oak® New Shadow Grass® is the right choice. It's made specifically for serious waterfowlers with a weather-resistant composite stock and forearm with grip enhancing Dura-Touch® Armor Coating finish. The barrel has an improved ventilated rib design and features .742" Back-Bored Technology and the Invector-Plus™ choke tube system for ideal shot patterns. The Active Valve system reliably cycles factory ammunition from 1⅛ oz., 2¾" field loads to 3½" magnums. Sling swivel studs are included. See charts beginning on page 52.

**SUPER X3
CAMO FIELD**

In the confines of flooded timber, a versatile, fast, reliable shotgun that can handle the most severe conditions is a must — the new Super X3 Camo Field 3½" meets that criteria. The gas-operated Active Valve action cycles a wide variety of loads, and reduces recoil more effectively than recoil-operated systems. Fully concealed in Mossy Oak® New Break-Up® camo, an all-new composite stock and forearm are coated with Dura-Touch® Armor Coating for superb grip, feel and protection. The fast swinging barrel features the Invector-Plus™ choke tube system and .742" Back-Bored Technology for optimal patterning. Three choke tubes and sling swivel studs are included. See charts beginning on page 52.

**SUPER X3
CANTILEVER DEER**

You'll go hunting just to be seen with a new SX3 Cantilever Deer. Our proven Active Valve reduces recoil and cycles fast for incredible follow-up shot speed. The unique cantilever design allows you to aim with the rear adjustable sight and the TRUGLO® fiber-optic front sight, or, fold down the rear sight and instantly sight down the lengthwise groove in the cantilever. You can easily fasten an electronic or conventional scope to the Weaver-style rail on the cantilever. The Super X3 Cantilever Deer also features gunmetal grey Perma-Cote™ UT (Ultra Tough) surface finish on the barrel and receiver for extreme corrosion protection, and Dura-Touch® Armor Coating on the composite stock and forearm. A compact 22" rifled barrel provides unequalled accuracy with 3" slugs. See charts beginning on page 52.

SUPER X2™ TURKEY

Leave nothing to chance. If you've managed to trick a big tom and call him into range, you had better have a gun you can count on. That's why the Super X2 is one of the best selling turkey guns around. Chock-full of features like removable TRUGLO® sights, Mossy Oak® camo for ultimate concealment and dense patterning extended choke tubes, you won't find a more suitable tool for turkey hunting. But to bring out the best in the SX2, you have to shoot it. Only then will you be able to fully appreciate the recoil reduction provided by the proven Active Valve, which eliminates recoil before it reaches your shoulder.

SUPER X2 UNIVERSAL HUNTER

TRUGLO
DURA-TOUCH
Armor Coating

The Super X2 Universal Hunter is the ultimate gun for hunting all things feathered. Featuring removable TRUGLO® sights, the Active Valve System for reduced recoil, a versatile 3½" chamber, 26" barrel and four Invictor-Plus™ choke tubes, including an Extra-Full Extended Turkey tube, the Universal Hunter can be configured for turkey, pheasant and waterfowl. Extra features include the protective Dura-Touch® Armor Coating on the weather-resistant composite stock. Sling swivel studs are included. The .742" Back-Bored Technology provides optimum shot patterns. The receiver is drilled and tapped for mounting a scope or electronic sight. See charts beginning on page 52.

SUPER X2 NWTF TURKEY

TRUGLO
DURA-TOUCH
Armor Coating

You are sure to appreciate this Super X2, endorsed by the National Wild Turkey Federation®. The NWTF Turkey features a hard-hitting 3½" chamber to bring down big birds, and a maneuverable 24" barrel with Extra-Full Extended Turkey tube. Dura-Touch® Armor Coating enhances grip on the composite stock and forearm. Rely on the Active Valve gas system to reduce recoil and fire a wide variety of factory loads. Metal TRUGLO® sights and sling swivel studs are standard. The .742" Back-Bored Technology provides optimum shot patterns. The receiver is drilled and tapped for a scope or electronic sight (bases sold separately). A brass NWTF medallion on the pistol grip completes the package. A portion of all sales of this gun helps support the NWTF. See charts beginning on page 52.

SUPER X2™ TARGET

Pull! A great day at the sporting clays range demands an autoloader you can shoot all day, and that speaks about more than just reliability. Just try and shoot without fatigue at two or three hundred targets with a recoil-operated gun. That's the beauty of the Super X2's Active Valve. Not only does it make the SX2 extremely reliable and compatible with a wide variety of loads, it also reduces recoil before it ever reaches your shoulder for increased shooting comfort, all day long.

Each SX2 Sporting model includes two gas pistons for extreme load versatility and spacers to adjust drop and cast for a perfect fit.

SUPER X2 SIGNATURE II

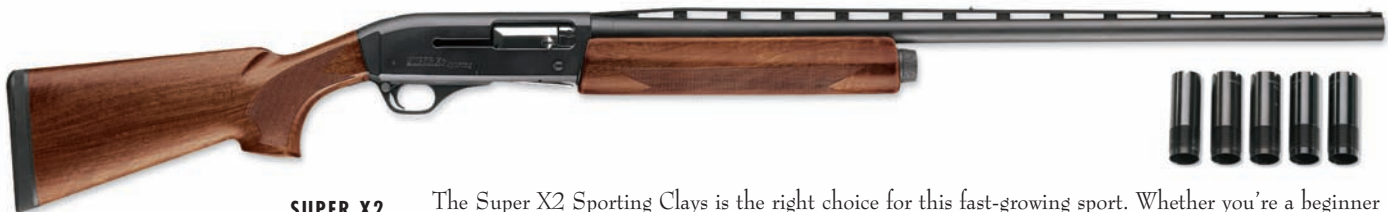

Nothing overshadows the looks of the Signature II — except perhaps its flawless function and perfect balance. This Super X2 features the ultra-reliable Active Valve System for maximum load versatility and recoil reduction. A specially designed spacer-adjustable stock provides a custom fit. The red anodized alloy receiver and barrel complement the black metallic fleck paint on the special stock and forearm and are sure to stand out on the rack. The .742" Back-Bored Technology provides optimum patterning. Two gas pistons are provided to cover the full range of factory ammunition, as are five Invector-Plus™ choke tubes. See charts beginning on page 52.

SUPER X2 SIGNATURE RED

Serious sporting clays contenders reach for the Super X2 Signature Red Sporting. The foundation is its fast and reliable gas-operated action with the Active Valve System, giving the confidence you need to concentrate on targets during competitive shooting. Dura-Touch® Armor Coating improves your grip and protects the red finish that screams "Winchester." The specially designed hardwood stock helps control recoil and is spacer-adjustable for a personalized fit. The .742" Back-Bored Technology provides optimum patterning. Five Invector-Plus™ choke tubes are included, plus two gas pistons to cover the full range of factory ammunition. See charts beginning on page 52.

SUPER X2 SPORTING CLAYS

The Super X2 Sporting Clays is the right choice for this fast-growing sport. Whether you're a beginner or a seasoned shooter, you'll appreciate the benefits of fast operation and recoil reduction the Active Valve System provides. This model features a spacer-adjustable stock for a custom fit. The low-luster finish reduces glare and fits perfectly with the satin finish of the walnut stock and forearm. Two gas pistons are provided to cover the full range of factory ammunition. The .742" Back-Bored Technology provides optimum patterning. Five Invector-Plus™ choke tubes are included. See charts beginning on page 52.

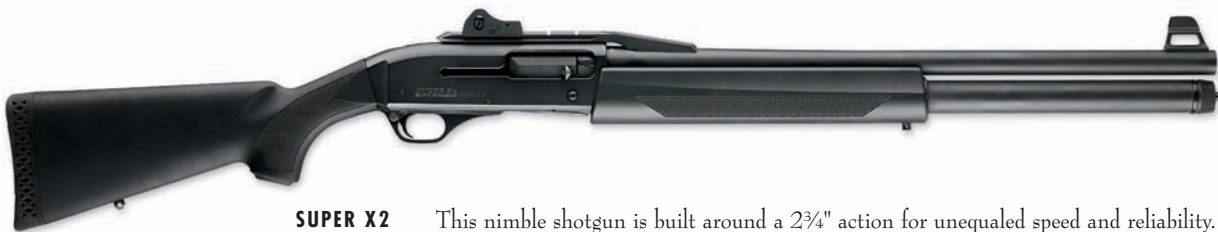

SX2

The spirit of competition is alive and well. Across the country competitive shooting sports are growing fast, as is the following of the Winchester Super X2 autoloader. In competitions where time is of the essence, a Super X2 is a huge advantage. After all, the gas-operated Super X2 is the fastest gun around, capable of firing five shells in just over one half of a second, thanks to its self-regulating Active Valve System. Heat up your competition this summer with an SX2.

LPA Ghost-Ring Rear Sight

**SUPER X2
PRACTICAL MK II**

This nimble shotgun is built around a 2¾" action for unequalled speed and reliability. The Active Valve gas system cycles the lightest loads and reduces recoil for unbelievable follow-up shot accuracy. A removable LPA ghost-ring type rear sight mounts to the Weaver-style rail on the cantilever. TRUGLO® fiber-optic elements in the sights aid in target acquisition. Dura-Touch® Armor Coating improves grip on the composite stock and forearm. A compact 22" barrel and eight-round extended magazine make for fast handling. The Standard Invector™ choke system adds performance with slugs or shot. Two Active Valve pistons are included. See charts beginning on page 52.

**SUPER X2
PRACTICAL MK I**

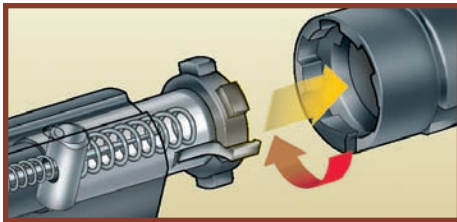

Lower your times and raise your scores with a ready-for-competition Super X2 Practical MK I. The 2¾" gas-operated action is proven fast — five shots in .51 of a second — and reduces recoil to put those shots on target. The MK I features a compact 22" barrel, eight-round extended magazine and rugged composite stock and forearm. A TRUGLO® fiber-optic front sight helps pick-up targets fast. The Standard Invector™ choke system improves pattern performance with shot and still works accurately with rifled slugs. See charts beginning on page 52.

MODEL 1300 SPEED PUMP™

The Speed Pump rotary bolt. The rotary bolt pump-action found on the Model 1300 is the reason behind the impressive speed of these proven shotguns. We've incorporated this rugged system for decades, long before our competitors, and have continually improved it to perfection. In addition to speed, this system provides a solid, tight lock-up with the barrel.

The proven Speed Pump rotary bolt is a mainstay in the Winchester shotgun line. In addition to being fast, the rotary bolt is super strong. So is the pumping mechanism, which is controlled by dual steel action bars that eliminate twisting and wasted energy when cycling the action.

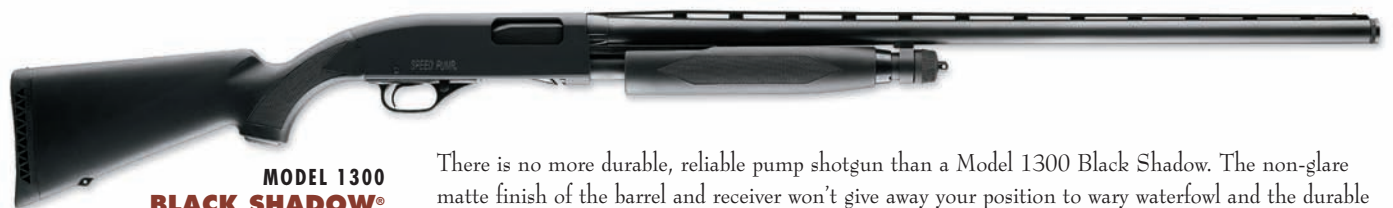

**MODEL 1300
SPORTING FIELD
TRUGLO**

You won't find a more well-rounded pump shotgun than the Model 1300 Sporting Field. Designed with features not found on other guns in this price range, like a premium Pachmayr® Decelerator® recoil pad, TRUGLO® TRU-BEAD® front sight with four extra fiber-optic elements in different colors, a mid-bead, and a great-looking walnut stock and forearm with satin finish and cut checkering. The 28" barrel features the WinChoke® system and five choke tubes to accommodate any hunting or range situation you'll encounter. See charts beginning on page 52.

**MODEL 1300
SPORTING FIELD COMPACT
TRUGLO**

Reinforce confidence on the range and in the field with a shotgun that shoots well and fits smaller shooters. The combination of a stock with compact dimensions, a rear-positioned forearm, and naturally fast handling make the Model 1300 Sporting Field Compact an ideal shotgun. It includes high-performance features like a TRUGLO® TRU-BEAD® fiber-optic front sight, five WinChoke® tubes and a soft Pachmayr® Decelerator® recoil pad to make shooting all day a pleasure. The 24" barrel provides a more manageable weight for a fast swing. See charts beginning on page 52.

**MODEL 1300
BLACK SHADOW®**

There is no more durable, reliable pump shotgun than a Model 1300 Black Shadow. The non-glare matte finish of the barrel and receiver won't give away your position to wary waterfowl and the durable composite stock and forearm are up to any abuse a day afield can dish out. The hard working Speed Pump action fires all factory steel, tungsten, bismuth and lead shot compatible 2¾" and 3" magnum loads. Available in both 12 gauge and 20 gauge models. A 12 gauge model is also available as a combo that includes both a rifled barrel and a 28" vent rib field barrel. See charts beginning on page 52.

1300

MODEL 1300 TURKEY

Talking turkey. Thanks to the efforts of the National Wild Turkey Federation®, turkey populations nationwide continue to thrive. This has led to turkey hunting becoming one of the fastest growing, most challenging hunting opportunities available. Winchester turkey guns are designed to suit the specialized needs of the turkey hunter, and bringing home one of these birds requires all the help you can get.

MODEL 1300 NWTF SHORT TURKEY TRUGLO

The Model 1300 NWTF Short Turkey is the most specialized turkey gun ever. Its highly maneuverable 18" barrel glides through thick brush with ease and allows for an unobstructed swing. The adjustable metal TRUGLO® fiber-optic sights provide low light accuracy, and the receiver is drilled and tapped for mounting optics. The included Extra-Long, Extra-Full Extended Turkey tube provides extremely tight, dense patterns. Mossy Oak® New Break-Up® camo keeps you hidden from wary eyes. The rugged composite stock is finished with a National Wild Turkey Federation medallion on the grip cap. See charts beginning on page 52.

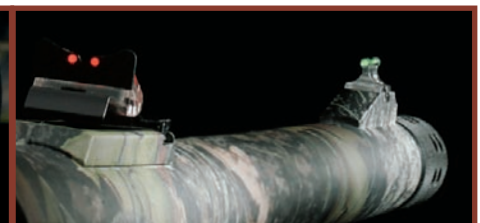

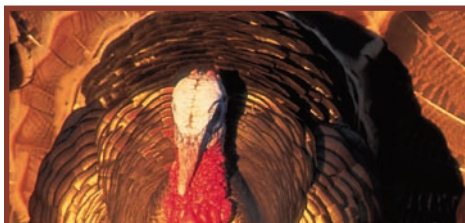

MODEL 1300 NWTF BUCK & TOM TRUGLO

The NWTF Buck & Tom is what you need for whitetail and wary turkey. With the included extended rifled tube for deer or the Extra-Long, Extra-Full Extended Turkey tube on toms, the smooth bore 22" barrel is highly accurate. Adjustable metal TRUGLO® fiber-optic sights are also included, or mount-up a scope or electronic sight on the drilled and tapped receiver. Full coverage Mossy Oak® New Break-Up® camo keeps you hidden when the action is close. A composite stock and forearm keep weight to a minimum. NWTF grip cap medallion included. Authorized and endorsed by the National Wild Turkey Federation. See charts beginning on page 52.

MODEL 1300 UNIVERSAL HUNTER TRUGLO

With the proven Speed Pump™ rotary bolt and a long list of accessories, versatile is the best word to describe the Universal Hunter. Turkeys, ducks, pheasants ... this shotgun is ready for any action. It features a 26" ventilated rib barrel with Extra-Long, Extra-Full Extended Turkey, Improved Cylinder, Modified and Full WinChoke® tubes included. A drilled and tapped receiver makes it easy to mount a scope or electronic sight, or use the easily removable metal TRUGLO® three dot sights. Full coverage Mossy Oak® New Break-Up® camo, composite stock and forearm with magazine cap and stock sling studs are standard. See charts beginning on page 52.

MODEL 1300 FIELD

SPEED PUMP™

The qualities of a fine field shotgun are evident the first time you pick it up. When you handle a Model 1300, you'll know what we mean. Experience the handsome lines and finish, light weight, centered balance and instant pointability firsthand. The Winchester Speed Pump™ design also provides you with a feeling no other pump offers, the feeling of an inertia-driven slide-action that can deliver three shots in just over a half second.

**MODEL 1300
WALNUT FIELD**

Don't let the handsome look of the Walnut Field fool you. Even though it features an elegant, gloss-finished walnut stock and forearm with cut checkering, it's still the classic Winchester Speed Pump. You can always count on this dependable 12 gauge — from ducks to pheasants to clay birds. And, because it's a Speed Pump, it will get the job done fast. The WinChoke® interchangeable choke system is standard and includes Full, Modified and Improved Cylinder choke tubes. Available in 26" and 28" barrel lengths. See charts beginning on page 52.

**MODEL 1300
UPLAND SPECIAL**

Set apart by an English-style straight grip stock with a gloss finish, a fast swinging 24" vent rib barrel, and a compact forearm, the Upland Special is the most maneuverable Speed Pump ever. The straight grip moves your hand closer to the bore centerline for better balance, letting the Upland Special come to the shoulder quickly to put you on target fast. Count on the Speed Pump action to work when you need it most. The Upland Special is available with a 3" chamber, in both 12 and 20 gauge models. Three WinChoke® tubes are included. See charts beginning on page 52.

**MODEL 1300
RANGER® GLOSS**

Having all the important features necessary in a fine field shotgun, one of the world's most popular field guns gets even better. The new Ranger Gloss features a nicely finished hardwood stock and forearm for the perfect mix of rugged good looks and value. Count on the versatile WinChoke® system found in the 28" ventilated rib barrel to give you the shot patterns you need, whatever game you're after. The Ranger shoots all factory 2¾" and 3" magnum loads, and is available in 12 gauge and 20 gauge models, including a compact version for younger or smaller shooters. See charts beginning on page 52.

1300

MODEL 1300 DEER

You won't find a better value in a fast-handling gun anywhere. Fast, balanced and ultra-reliable, the Model 1300 epitomizes the perfect pump-action shotgun. Maneuverable Winchester® deer guns are ideal when you have only a split-second opportunity for a shot at a fast moving whitetail. Inertia assisted pumping from the Speed Pump™ action and stiff, dual action bars ensure fast follow-up shots you'll appreciate, and value you'll appreciate even more.

**MODEL 1300
BLACK SHADOW® DEER**
TRUGLO

The Winchester Black Shadow Deer is available with a rifled barrel for shooting sabot slugs (available in 12 or 20 gauge). It's the hardest working pump around. You'll appreciate the non-glare finish of the composite stock, forearm and exposed metal surfaces as much as the receiver that is drilled and tapped for mounting a scope. Adjustable rifle sights and sling swivel posts are included. A 12 gauge model is also available as a combo that includes both a rifled barrel and a 28" vent rib field barrel. See charts beginning on page 52.

**MODEL 1300
BLACK SHADOW®
CANTILEVER DEER**

Add a low-profile, Weaver-style cantilever scope mount to a rifled 22" barrel and you'll have the most accurate pump-action slug gun available. The solid cantilever mount keeps the scope firmly connected to the barrel, ensuring the scope stays sighted in while allowing the shotgun to easily be taken down for cleaning. The composite stock with raised comb is ideal for medium eye-relief scopes that provide exceptional field of view. 12 gauge only. (Scope not included.) See charts beginning on page 52.

**MODEL 1300
RANGER® DEER**
TRUGLO

Speed, reliability, balanced handling, strength — you'll find each of these features, plus a long list of others, in the value-packed Ranger Deer shotgun. Available in 12 or 20 gauge, the 22" rifled barrel accurately guides today's sophisticated sabot slugs to their targets. The receiver is drilled and tapped to accept scope mounts or use the adjustable, metal TRUGLO® rifle sights to provide excellent low-light target acquisition. The low glare, satin-finished hardwood stock and forearm have cut checkering. See charts beginning on page 52.

MODEL 1300 NRA DEFENDER

Safety and security. That's what Winchester® Model 1300 NRA Defender shotguns and the "NRA Personal Protection In The Home Course" deliver. With a Model 1300 NRA Defender, you get the peace of mind that comes from owning the very best in security and protection. A portion of the proceeds from this gun benefits the NRA Personal Protection In The Home Program that helps others secure their homes and protect their families. Winchester. Defender. NRA. Three words that belong together and belong on your next gun.

**MODEL 1300
NRA PRACTICAL DEFENDER**

TRUGLO

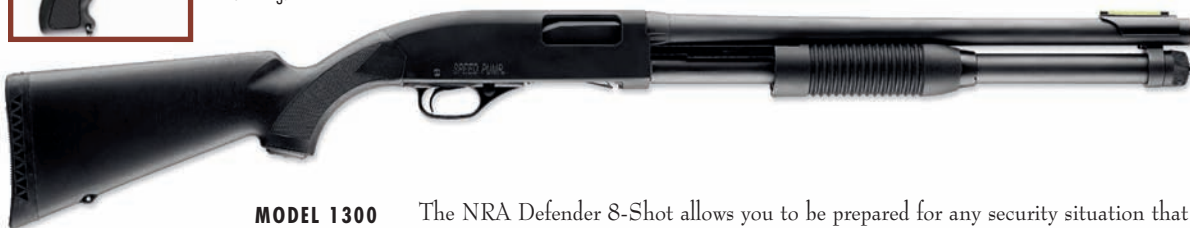

NRA

A do-it-all shotgun, the NRA Practical Defender features an accurate 22" barrel with the WinChoke® system, adjustable open sights, and is ideal for home security, competition or hunting. The Practical Defender is designed for top performance in action shooting events, and is handy when camping in bear country. Additionally, it is a capable deer gun, accurately firing Foster slugs or sabots when using a rifled choke tube (available separately). Features an eight-round magazine with a composite stock and forearm with the distinctive NRA logo grip cap. TRUGLO® sights standard. See charts beginning on page 52.

A pistol grip is included on the NRA Defender 8-Shot Combo. This accessory makes the Defender more compact for easy storage and provides extra control when firing.

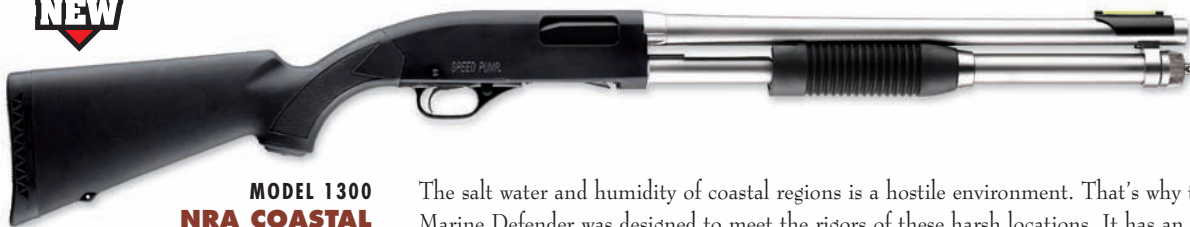

**MODEL 1300
NRA DEFENDER 8-SHOT**

TRUGLO

NRA

The NRA Defender 8-Shot allows you to be prepared for any security situation that comes your way. It's easy to pack and carry, and handles both buckshot and rifled slugs. Features include a seven-shot magazine, (plus one in the chamber), 18" cylinder choked barrel, non-glare metal surfaces with a composite stock and forearm. Choose from the full stock version with a removable TRUGLO® fiber-optic sight or the 12 gauge Combo with both pistol grip and full stock included. The full stock model is available in both 12 and 20 gauge. See charts beginning on page 52.

**MODEL 1300
NRA COASTAL
MARINE DEFENDER**

DURA-TOUCH
Armor Coating

TRUGLO

NRA

The salt water and humidity of coastal regions is a hostile environment. That's why the NRA Coastal Marine Defender was designed to meet the rigors of these harsh locations. It has an 18" nickel-plated, stainless steel barrel, anodized aluminum alloy receiver and plated parts for corrosion resistance. Dura-Touch® Armor Coating improves your grip on the composite stock in the wet weather. Cylinder choked with a seven-shot magazine. Sling swivel studs are installed. You must compare features with the competition before you buy. Removable TRUGLO® fiber-optic sight. See charts beginning on page 52.

1300

COMPACT GUNS

The guns that fit. Finding high-quality rifles and shotguns that fit youth and smaller-framed shooters is difficult. Smaller, shorter guns are easier for smaller shooters to use, and a properly fitted gun also makes teaching easier and builds confidence faster. These Compact guns are of the same high quality you've come to expect from Winchester® Rifles and Shotguns. They give special attention to features like shorter, shallower stocks, smaller grips for reduced trigger reach and shorter, lighter barrels to make shooting more fun.

**MODEL 94
TRAPPER COMPACT**

Take the Trapper, shorten the straight grip stock to a quick-handling 12½" length of pull, and you have one slick, fast-cycling rifle. The new Trapper Compact is most suitable for smaller-framed shooters. The barrel is 16" long, making it easy to carry and maneuver through heavy cover. It's easy to pack along just about anywhere. The two-position, top-tang safety is easy to see and operate. Chambered in 357 Mag. with a rubber buttpad for comfortable recoil. A saddle ring and hammer spur extension are included and it's drilled and tapped for scope mounts. See charts beginning on page 52.

MODEL 1300
RANGER® GLOSS COMPACT

With a length of pull of just 13", the Ranger Compact is an affordable, comfortable shotgun for the young shooter. Drop at heel is 2³/₈" for better rib alignment. The inertia-assisted Speed Pump™ rotary bolt and rearward positioned forearm makes pumping faster and much easier. The lightweight alloy receiver is easier to hold and swing. The grip is smaller for better finger-to-trigger fit. Complete with the interchangeable WinChoke® system for excellent shot patterns. Select 12 or 20 gauge. See charts beginning on page 52.

MODEL 1300
SPORTING FIELD COMPACT
TRUGLO

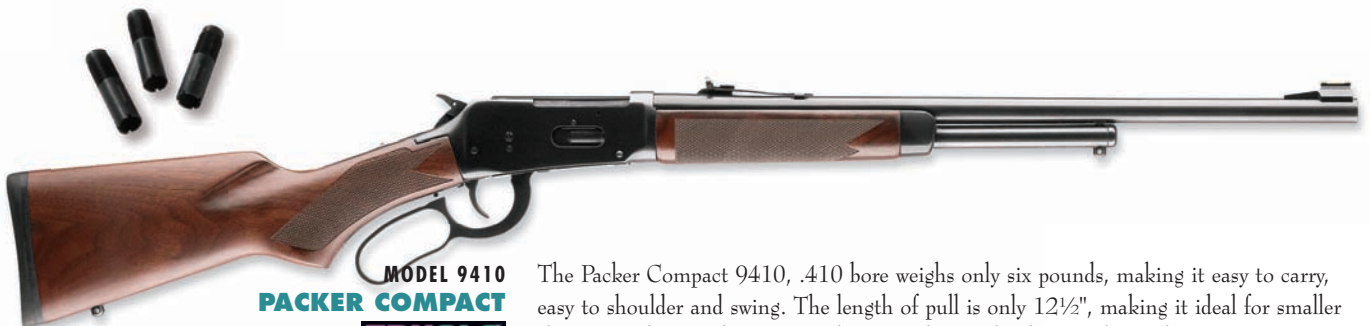

The Model 1300 Sporting Field Compact has the fast Speed Pump™ system with a shorter length of pull. High-performance items like a TRUGLO® TRU-BEAD® fiber-optic front sight, mid-bead and five interchangeable WinChoke® tubes, along with the Pachmayr® Decelerator® recoil pad make this feature-packed model very quick and fun to shoot. Easy-to-swing 24" ventilated-rib barrel. Four extra fiber-optic inserts in different colors included. See charts beginning on page 52.

MODEL 70
CLASSIC COMPACT

For smaller adults, younger shooters and those looking for the perfect mountain rifle, the Model 70 Compact is ideal. With a short 13" length of pull, shallow stock profile and trim 20" barrel, it's easy to carry and quick to shoulder. Available in 243 Win. or 7mm-08 Rem. calibers, with light recoil and excellent fit for smaller shooters, this Model 70 is the best choice ever. See charts beginning on page 52.

MODEL 9410
PACKER COMPACT
TRUGLO

The Packer Compact 9410, .410 bore weighs only six pounds, making it easy to carry, easy to shoulder and swing. The length of pull is only 12¹/₂", making it ideal for smaller shooters and young hunters. And it won't be caught short, at least where important features are concerned. It features the Invector™ choke system, allowing for different patterns of shot. The TRUGLO® front sight is quick to line up with the shallow "V" notch of the rear sight. Sling studs are included. See charts beginning on page 52.

Like fine art, those who appreciate fine workmanship and exceptional beauty will admire a custom-built Winchester.

The Winchester® Custom Shop stands ready to help you create an heirloom firearm, one that will help you recall some of the finest hunting and shooting experiences of your life and make new memories for years to come. Isn't it time you treated yourself to a Winchester Custom Shop rifle?

**MODEL 70
CUSTOM AFRICAN
EXPRESS
MAG**

Africa. The very word gives chills to those who have been there, and creates a burning desire to go in those who haven't. The Custom African Express blends art and function with a hand-rubbed oil finish on a handmade English walnut stock. Each stock is fitted with an ebony grip cap and forearm tip and 1" Pachmayr® Decelerator® recoil pad. An extended drop-box magazine and "Oberndorf"-style floorplate increases the magazine capacity to four. A full-length glass bedded action, hand-lapped Krieger® match-grade barrel with precision match-grade crown, three-leaf express rear sight and hooded adjustable front sight blade all come standard. Available in both right- and left-hand versions in either blued or stainless steel. See charts beginning on page 52.

**MODEL 70
CUSTOM
SHORT ACTION
SA**

Straight from the hands of skilled Custom Shop craftsmen comes the Model 70 Custom Short Action. Beautifully assembled, it features a satin finished, semi-fancy American walnut stock with a shadowline cheekpiece and inletted sling swivel bases lending a sleek, streamlined look. The classic, Controlled Round Feed action is mated to a Krieger® match-grade barrel and is available in several popular short action calibers including the fast-stepping WSMs. Available in right- and left-hand models in either blued or stainless steel. See charts beginning on page 52.

MODEL 70
CUSTOM FEATHERWEIGHT™
SA, LA

Only one rifle can rival the Model 70 Featherweight, and that's a Custom Shop Featherweight. The Controlled Round Feed action with massive claw extractor bolt is hand-honed for unbelievable smoothness. The semi-fancy American walnut stock features a Schnabel fore-end, cut checkering and is fitted with a 1" Pachmayr® Decelerator® recoil pad and flush-mount sling swivel bases. A match-grade 22" Krieger® barrel is chambered for a variety of short and long action cartridges. Offered in right- and left-hand versions in either blued or stainless steel. See charts beginning on page 52.

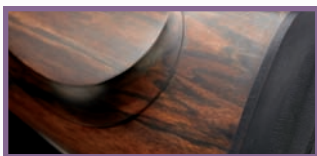

MODEL 70
CUSTOM ULTIMATE
LA

The Custom Ultimate takes a Model 70 to the next level. A Controlled Round Feed action with stout one-piece steel floorplate and trigger guard, in either blued or stainless steel is the foundation. Add an impressive list of hand-crowned match-grade Krieger® barrel options including round, fluted round or full tapered octagon. A fancy-grade American walnut stock featuring slim styling, a rounded fore-end, reverse comb and inletted swivel bases completes the vision. It's offered in right- and left-hand versions in either blued or stainless steel. See charts beginning on page 52.

MODEL 70
CUSTOM SAFARI EXPRESS
MAG

With the Custom Safari Express, you're ready for a once-in-a-lifetime experience. It's easily recognized by its barrel-mounted front sling swivel, precise three-leaf express rear sight and adjustable front sight with hood, and admired for the semi-fancy American walnut stock and cheekpiece. The premium 1" Pachmayr® Decelerator® recoil pad takes the bite out of the heavy-recoiling African cartridges roaring from the Krieger® match-grade barrel. A custom one-piece trigger guard and steel floorplate with hand-honed internal parts create smooth looks and even smoother functioning. Available in blued and stainless steel for most popular African calibers in both right- and left-hand versions. See charts beginning on page 52.

MODEL 70
CUSTOM EXTREME
LIGHTWEIGHT WEATHER II
SA, LA

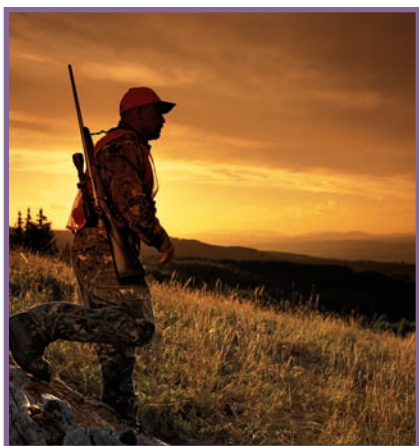

From Africa to Alaska, the Custom Lightweight Extreme Weather II is the perfect rifle for the adventurous hunter. The weather-resistant stainless steel action, internal parts and Krieger® barrel withstand the effects of nature, and are carefully set into a lightweight McMillan® Hunters Edge™ fiberglass stock with a 1" Pachmayr® Decelerator® recoil pad. Available in most popular short and long action calibers, including the popular WSMs. See charts beginning on page 52.

CUSTOM SHOP

This year the Winchester Custom Shop has introduced several new Model 70s that will simply take your breath away.

The Classic Custom Maple emits a warm glow that just begs to be touched. The Continental Hunter exudes Old World charm and elegance, while the Custom Stainless Laminate is as modern as tomorrow. Those who revel in the rich history of the Model 70 will appreciate the commemoration of seven decades building this great rifle and a full century of America's favorite rifle cartridge, the versatile 30-06 Springfield. Come and explore the exciting world of the Winchester® Custom Shop for yourself.

The Winchester Custom Shop celebrates the 100th Anniversary of the 30-06 Springfield cartridge by offering this collectable heirloom Model 70 with a gold and nickel engraved centennial floorplate depicting a trio of marching Allied doughboys from WWI and a sport hunter pursuing a trophy whitetail deer, along with a gold-enhanced barrel inscription commemorating 100 years of this great cartridge. It's an edition that will be limited to just 100 rifles.

The Custom "70 Years of the Model 70" features your choice of three special floorplate engravings, depending on the caliber. A bighorn sheep graces the 270 Win., a majestic elk decorates the 30-06 Springfield, and a moose appears on the 300 Win. Mag.

MODEL 70 CUSTOM CONTINENTAL HUNTER

SA, LA

The Custom Continental Hunter features a sleek, gloss finished, hand-checked stock of fancy Claro walnut with a trim international-style shadowline cheekpiece, rounded pistol grip and Schnabel fore-end. The Niedner-style checkered steel buttplate and blued sling swivel bases help create a rifle that harkens back to an Old World hunting estate. The Controlled Round Feed action and Krieger® barrel are glass bedded and available in blued or stainless steel, in several popular calibers, for right- or left-hand shooters. See charts beginning on page 52.

NEW

**MODEL 70
CUSTOM STAINLESS
LAMINATE
SA**

The Model 70 Custom Stainless Laminates offers a Controlled Round Feed action with an engine turned bolt body mated to a sporter barrel. It's bedded in a handmade, black/gray or brown Featherweight™ stock with a Schnabel fore-end and 70-point pattern hand-hewn checkering. It features a 1" Pachmayr® Decelerator® recoil pad. Chambered in all four WSM calibers, in a right-hand version only. See charts beginning on page 52.

MODEL 70
LA**

For those who treasure the rich history of the Model 70, look no further than the Custom Special 70 Years of the Model 70 rifle. Chambered in 270 Win., 30-06 Sprg. and 300 Win. Mag., each caliber has its own unique game scene-engraved floorplate (see photos on opposite page) and features a semi-fancy walnut stock with inletted sling swivel bases. The engraved sporter barrel joins to a Controlled Round Feed action to make this rifle something to be treasured for generations. Just 70 of these incredible rifles will be available in each caliber, in right-hand blued steel only. (Scope not included.) See charts beginning on page 52.

**MODEL 70
CUSTOM 100TH
ANNIVERSARY 30-06
LA**

Whenever one thinks of the Model 70, one also remembers that all-time favorite American cartridge, the 30-06 Springfield. The Custom 30-06 celebrates 100 years of this great cartridge by offering a semi-fancy American walnut Featherweight™ stock with a single steel crossbolt, one-piece engraved floorplate and inletted sling swivel bases. The high-lustre blued and engraved sporter barrel is mated to a Controlled Round Feed action, making this rifle something to be enjoyed for the next one hundred years. Just 100 of these magnificent rifles will be offered in a right-hand version only. See charts beginning on page 52.

NEW

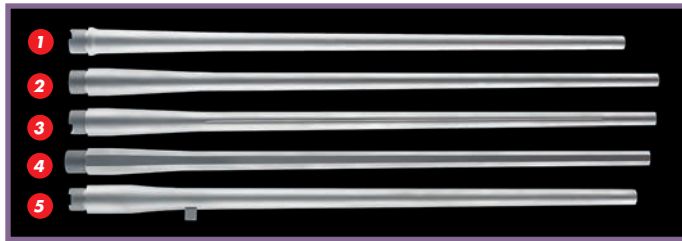

**MODEL 70
CUSTOM MAPLE
SA, LA**

No other wood has the warm, inviting look and feel of maple, and thus we offer the Model 70 Custom Maple. The gloss finished, handmade fiddleback maple stock with cheekpiece, hand-cut Pre-'64 point pattern checkering, black fore-end cap, Custom Shop pistol grip cap, and inletted sling swivel bases make this Model 70 stand out in any company. The blued or stainless steel action and barrel on the Custom Maple is full-length glass bedded. Available in very limited quantities in several long and short action calibers, in both right- and left-hand versions. See charts beginning on page 52.

CUSTOM

CUSTOM SHOP OPTIONS

A KRIEGER® BARREL FOR EVERY PURPOSE. The Winchester Custom Shop offers five different contours.

1. Featherweight™ tapered round barrel contour.
2. Sporter tapered round barrel contour.
3. Sporter fluted round barrel contour.
4. Full octagon tapered barrel contour.
5. Express tapered round barrel contour with additional barrel-mounted recoil lug.

Krieger® barrels are made on state-of-the-art machines using single-point cut rifling, the oldest and most precise rifling process. Each groove is cut individually, requiring several hundred passes of the cutting tool to create the finished barrel. This time honored method results in a highly accurate, perfectly concentric barrel

with uniform twist rate that induces no stress into the steel that must later be relieved. Each barrel is then carefully double lapped to a 16 micro-inch finish, with the lay of the steel in the same direction as bullet travel to reduce jacket fouling.

70-5 RECEIVER PATTERN

Right side: Scroll engraving on receiver and breech of barrel.

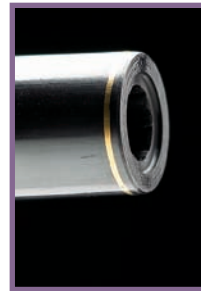

70-5 FLOORPLATE, GUARD, GRIP CAP

Scroll engraving on floorplate, trigger guard and grip cap.

70-7 RECEIVER PATTERN

ABBREVIATIONS:

- WTC = Cylinder Choke Tube
- Smooth = Non-rifled, smoothbore, no choke
- WF = Full Choke Tube
- Rifled = Fully rifled barrel, no choke
- WXF = X-Full Tube
- W3 = WinChoke, Full, Modified and Imp. Cylinder Tubes
- HDXF = High-Density X-Full Turkey Tube
- Cyl = Non-WinChoke, choked Cylinder Bore
- RS = Rifled extended tube for shooting Sabot-type slugs
- W1M = Modified Tube
- WXLX = High-Density X-Full, X-Long Turkey Tube
- WSW = WinChoke, Full, Improved Modified, Modified, Imp. Cylinder and Skeet

We proudly donate a portion of the sale of every Winchester firearm to the Heritage Fund, which helps to expand the legal defense against politically motivated lawsuits against our industry. We work together to promote the rightful tradition of firearms in America.

New Winchester firearms come from the factory with a safety lock. (Not shown actual size.)

NOTES:

1. All Non-Defender Model 1300s have a total shot shell capacity of 5, including one in the chamber. Defender Models have a total shot shell capacity of 8 and 7 in the Coastal Marine, subtract one for 3" shells in all Defender Models. 2. All WinChoke equipped guns are supplied with a special wrench for removing and installing choke tubes. 3. All Model 1300s (except Defender models) supplied with a removable plug that limits magazine capacity to 2 shells. 4. Checkering patterns may be subject to change. 5. Prices are in U.S. dollars and are subject to change without notice.

The logo for the Super X Rifle (SXR) features the letters 'SXR' in a bold, stylized, outlined font.The logo for the Takedown Model 94 features the words 'TAKE DOWN' stacked above the number '94', all in a bold, outlined font within a rectangular border.The logo for the Super X3 autoloader features the letters 'SX3' in a bold, stylized, outlined font.

CELEBRATING 70 YEARS OF THE MODEL 70.

Seventy years ago, a new rifle was created by Winchester and was named the Model 70.

It was Winchester's first centerfire bolt-action designed specifically for sporting use, and quickly became known as "The Rifleman's Rifle." No other rifle in modern history has been emulated and imitated like the Model 70. For 2006, that same spirit of innovation is manifested in new products like the Super X Rifle (SXR), the first Winchester centerfire autoloading rifle produced in more than 30 years. The legendary Model 94 has been improved for 2006 to make it more portable by introducing a convenient new takedown model. This year the new Super X3 autoloader (SX3), with its light weight, fast-cycling gas operation, modern design and sleek styling is ready to perform, be it on the range or in the field. 2006 will long be remembered as the year Winchester Rifles and Shotguns left the competition seeing red.
