# WINCHESTER REPEATING ARMS® 2013. THE REAL DEAL.

2013 is another banner year for Winchester Repeating Arms. Pump fans have several new Super X Pump shotguns to choose from, including the new wood-stocked Field, the robust Marine Defender and the rugged Black Shadow Deer. Model 70 lovers have a pair of new camo-clad rifles that will help them disappear into the deepest woods. No Winchester Repeating Arms catalog would be complete without bringing back a few all-time favorites like the Model 73 and the Model 1894 Carbine, two of the most historically significant rifles of the last half of the 19th century. Remember, if it doesn't say Winchester Repeating Arms on the barrel, it isn't the real deal.

# SUPER X<sup>®</sup> PUMP

FASTEST  
PUMP ACTION.  
PERIOD.

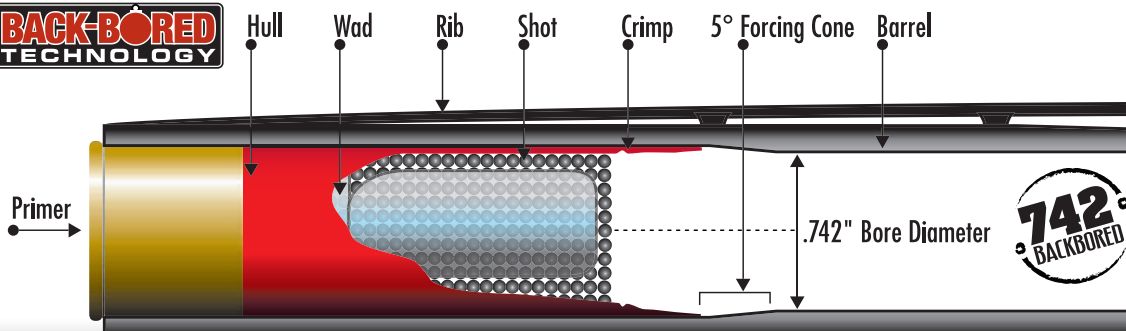

Nothing in the world sounds like shucking a shell into a pump shotgun. The Winchester<sup>®</sup> Super X Pump is the perfect choice for pump fans with its smooth as glass and ultra-reliable inertia-assisted slide action. Three shots can be delivered in just a half second, a blistering pace that blows the other pumps away. Your buddies may think your Super X Pump has autoloader speed. You know it does.

**BACK-BORED  
TECHNOLOGY**

**.742" BACK-BORED TECHNOLOGY** is based on extensive research and testing. When it comes to back-boring shotgun barrels, .742" is the ideal 12 gauge interior diameter to ensure tight, consistent patterns. Any larger and gases blow by the shot cup and reduce pellet velocity. Too tight and the pellets are deformed as they pass through the forcing cone, causing poor ballistic performance.

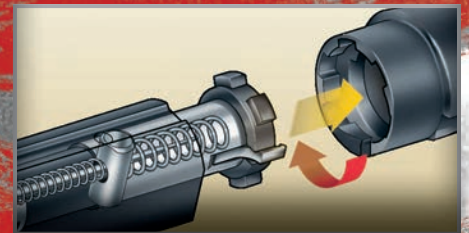

**HARD CHROME CHAMBER AND BORE** are critical for today's steel or tungsten shot. Hard chrome makes the surfaces highly resistant to wear and gives you superior protection from rust and corrosion. That's why all smoothbore Super X<sup>®</sup> Pump shotguns feature a hard-chromed chamber and bore.

From the duck blind to the firing line, the **INVECTOR-PLUS™ CHOKE TUBE SYSTEM** is the world's most consistent. The Super X<sup>®</sup> Pump comes with full, modified and improved cylinder flush-mounted choke tubes so your gun is ready for anything, right out of the box. Additional choke tubes are available at your local Winchester Repeating Arms dealer.

**SPEED-PLUG SYSTEM** lets you remove the three-shot adapter with your fingers. Just remove the magazine cap, push on the spring retainer holding the spring in place, twist and remove the adapter. It's a trouble-free design that lets you "pull the plug" in mere seconds without any tools.

Four massive **ROTARY BOLT LUGS** provide support, strength and solid lockup in the receiver of the lightning-fast Super X<sup>®</sup> Pump. Under recoil, the mass of your body slows the rearward travel of the shotgun, while the inertial motion of the bolt, slide and forearm continue cycling the action to give you a head start ejecting the fired shell. Robust dual steel action guide bars eliminate the twisting and binding that waste time and energy when cycling the action.

**DROP-OUT TRIGGER GROUP** lets you remove one pin and pull the complete trigger system out for cleaning, lubrication and inspection. It's an easy way to keep your Super X<sup>®</sup> Pump in top shape, regardless of nasty weather or gritty shooting conditions.

The **CROSSBOLT SAFETY** button on the Super X<sup>®</sup> Pump is located on the front of the trigger guard for easy access, even when you're wearing heavy waterfowling gloves.

The Super X<sup>®</sup> Pump has the best recoil pad ever put on a synthetic stocked shotgun. Directional rib structures inside the **INFLEX TECHNOLOGY RECOIL PAD** help channel the recoil impulse by moving the comb down and away from your cheek. A hard heel insert on the pad makes shouldering the Super X Pump snag free regardless of what clothing you're wearing.

**BLACK CHROME FINISH** on the bolt, barrel, slide, action bars, trigger and other parts protects better than conventional bluing and stands up to years of wear and harsh conditions.

# SUPER X<sup>®</sup> PUMP

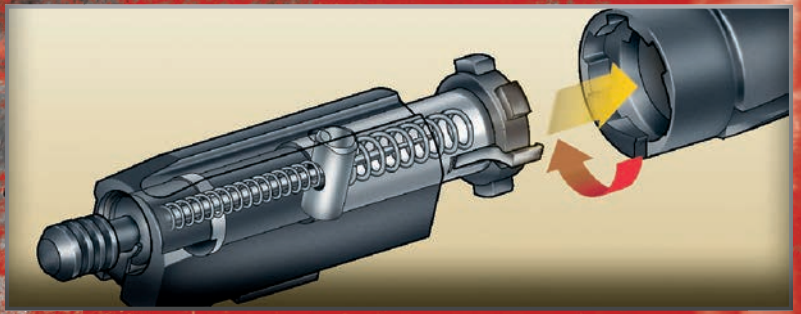

FASTEST  
PUMP IN  
THE FIELD.

Take to the field with a perfectly balanced pump that offers instinctive pointability and absolute reliability — the new Field model of the Super X Pump shotgun. Stocked in traditional hardwood and sporting a vent rib barrel with 3" chamber and Invector-Plus™ choke tubes, the Field is ready to drop a limit of birds at your command. Get behind a new Super X Pump Field and you'll be getting ahead of the game.

SXP<sup>®</sup>

Four massive **ROTARY BOLT LUGS** provide support, strength and solid lockup in the receiver of the lightning-fast Super X® Pump. Under recoil, the mass of your body slows the rearward travel of the shotgun, while the inertial motion of the bolt, slide and forearm continue cycling the action to give you a head start ejecting the fired shell. Robust dual steel action guide bars eliminate the twisting and binding that waste time and energy when cycling the action.

# SUPER X<sup>®</sup> PUMP

FASTEST  
PUMP ON  
THE POND.

If you're looking for a pump-action shotgun that's faster than a speeding greenhead, get the Super X Pump Waterfowl Hunter. No other pump-actuated system can match the fast, dependable, inertia-assisted rotary bolt of the SXP. This is the shotgun that pumps out three shots in a half-second so you can fill your limit before breakfast. Pick up an SXP Waterfowl Hunter, shoulder it, shoot it and you'll find it's the shotgun with range, power and speed to spare.

CYL

# SUPER X<sup>®</sup> PUMP SPEED FOR THE BIRDS.

Turn that strutting old tom into your Thanksgiving dinner with the fastest, 3½" pump shotgun on the planet! Its instant pointability, adjustable fiber-optic sights, extra-full choke tube and heavy magnum punch are perfect for putting wild turkeys on a platter. Follow-up shots come nearly as fast as with an autoloader because of the Super X Pump shotgun's inertia-assisted slide action that's capable of pounding out three shots in a mere half-second. The Inflex Technology recoil pad helps ease the thump of heavy turkey loads. With the SXP Turkey Hunter you'll never be under-gunned when that trophy tom is within range.

# SUPER X<sup>®</sup>3 JUST HOW FAST IS SUPER X3 FAST?

How about a blazing 12 shots in a mere 1.442 seconds? That's Winchester<sup>®</sup> Super X3 fast! But remember, raw cycling speed without precise control doesn't put more birds in your boat or get your name at the top of the scoreboard. That's why the Super X3 is designed to fit naturally with a fluid, balanced swing that becomes a perfect extension of your body. The softer felt recoil provided by the Inflex Technology recoil pad and the adjustable stock will contribute to your accuracy and let you enjoy shooting all day long. And when you're finished firing a few boxes of shells, you'll really appreciate how this slick-shooting gas-operated autoloader keeps itself cleaner than the competition. The Super X3 — when you're ready for the fast lane.

There is no reason to put up with a shotgun that does not fit you, because proper stock fit is critical to comfortable and accurate shooting. Most Super X<sup>®</sup>3 shotguns come with **LENGTH OF PULL SPACERS** that fit between the stock and the recoil pad, allowing easy adjustments to length of pull. When the length of pull is adjusted properly you smoothly shoulder the gun with confidence and the felt recoil you experience is greatly diminished. Adjustments range from 13<sup>3</sup>/<sub>4</sub>" to 14<sup>1</sup>/<sub>4</sub>" on wood stocks and from 14<sup>1</sup>/<sub>4</sub>" to 14<sup>3</sup>/<sub>4</sub>" on synthetic stock models.

Getting pounded by your gun's recoil is a thing of the past with the **INFLEX TECHNOLOGY RECOIL PAD**. Specially shaped rib structures located inside the pad help direct and channel the recoil impulse, moving the comb down and away from your cheek to reduce felt recoil to very manageable levels, even when shooting heavy magnum loads. A hard heel insert on the pad makes mounting the Super X<sup>®</sup>3 snag-free.

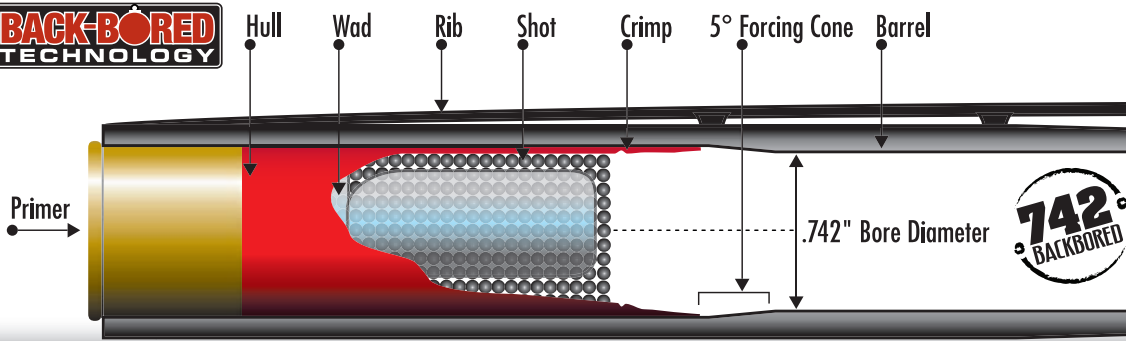

SHIM CAST ADJUSTMENT

SHIM COMB DROP ADJUSTMENT

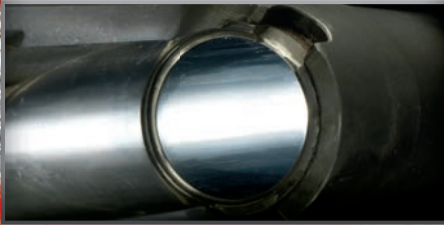

1- Neutral cast. Raises the comb. 1R/1L - Changes cast. Raises the comb.	2- Neutral cast. Neutral comb. 2R/2L - Changes cast. Neutral comb.	3- Neutral cast. Lowers the comb. 3R/3L - Changes cast. Lowers the comb.
---	---	---

Every shooter is different, and no single stock design will perfectly fit every person. **CAST/DROP SHIMS** on Super X<sup>®</sup>3 synthetic stock models allow you to easily adjust both cast on/cast off and drop at comb over a 1/4" range simply by inserting one of the six special shims between the receiver and the buttstock.

**.742" BACK-BORED TECHNOLOGY** is based on extensive research and testing. .742" is the ideal 12 gauge interior barrel diameter, ensuring uniform, consistent patterns. Any larger and gases blow by the shot cup and reduce pellet velocity. Too tight and the pellets are deformed as they pass through the forcing cone, causing poor ballistic performance.

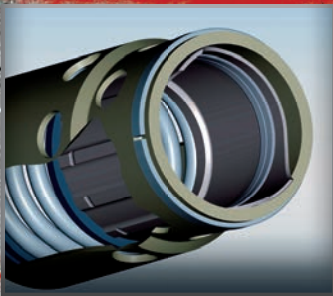

**HARD CHROME CHAMBER AND BORE** are critical for today's steel or tungsten shot. Hard chrome makes the surfaces highly resistant to wear and gives you superior protection from rust and corrosion. That's why all smoothbore Super X<sup>®3</sup> shotguns feature a hard-chromed chamber and bore.

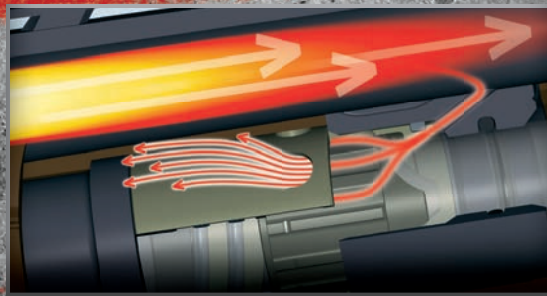

**LOAD DIVERSITY** means a Super X<sup>®3</sup> can reliably shoot them all, from light factory target shells to heavy magnum waterfowl and turkey loads. That's why the Super X<sup>®3</sup> has been proven as the most versatile autoloader on the range, in the marsh and in the field.

From the duck blind to the firing line, the **INVECTOR-PLUS™ CHOKE TUBE SYSTEM** is the world's most consistent. The Super X<sup>®3</sup> comes with either extended Signature or flush-mounted tubes, depending on the model. Additional tubes are available at your local Winchester Repeating Arms dealer.

The **ACTIVE VALVE SYSTEM** automatically self-adjusts to allocate the exact gas pressure necessary to reliably cycle a wide range of loads commonly used for hunting or target shooting. When firing the heaviest magnum loads in 3½" models, gases vent upward and a portion of them are vented forward out the Quadra-Vent™ ports in the forearm to help regulate bolt speed. Both 3" and 3½" Super X<sup>®3</sup> shotguns will reliably cycle even 1½ oz., 2¾" light target loads.

Excess gases from heavy loads are channeled through the forward **QUADRA-VENT™** ports for cleaner and more reliable operation.

The **AMBIDEXTROUS SAFETY** button on the Super X<sup>®3</sup> is located at the rear of the trigger guard and is easily reversible for both right- or left-handed shooters.

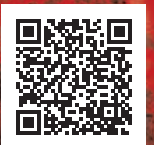

The **DROP-OUT TRIGGER GROUP** is easy to remove for cleaning or lubrication.

# RNT-V

Winchester Repeating Arms is a **PROUD SPONSOR** of the television show RNT-V. If you want to stay on top of your game in expert waterfowl calling and shooting, tune in for timely tactics. Check your local listings for broadcast dates and times.

# SUPER X<sup>3</sup> FASTEST GUNS AFIELD.

If you like the traditional look of fine walnut, you'll love the Super X3 Field. From its trim lines and crisp cut checkering to its premium recoil pad, the Super X3 looks good and shoots great. Smaller statured hunters should try the Super X3 Field Compact. It has all the features of the full size Super X3 and a shorter 13" length of pull stock to fit those with smaller builds. The Super X3 — still the fastest shotgun afield.

# SUPER X<sup>®</sup>3 DARKEST SHADOWS.

Shotguns look great in basic black and the Super X3 Black Shadow<sup>®</sup> looks absolutely awesome with a tough synthetic stock that's ready to take on snow, rain squalls, marsh mud and drifting dust. Deer hunters using modern slugs will love the Cantilever Buck. Its cantilever optics rail lets you remove the barrel without losing the zero on your conventional scope, or electronic red dot sight, and with see-through bases you can still use the adjustable open sights.

## RNT-V

"As hunters, we live by the whims of Mother Nature; there are no absolutes. As a duck hunter, I rely on the things I can control such as lifelike decoys, a good duck call, a warm pair of waders, shells and a trusty shotgun. I know that when it's time to get things done, every time I punch the safety and pull the trigger, my Super X<sup>®</sup>3 is gonna work."

# SUPER X<sup>3</sup> SPEED DEMON.

Camo is critical to keep you concealed from game and the Super X3 Waterfowl Hunter in the new Mossy Oak® Shadow Grass Blades blends right in with your blind to hide you from wary ducks and geese. The Universal Hunter in Mossy Oak® Break-Up Infinity® camo pattern helps you disappear in the deep woods. It's also drilled and tapped for scope mounts. Both of these camo-clad speed machines come in 12 and 20 gauge models to perfectly match your quarry and are designed to suit your individual hunting needs and shooting style.

## RNT-V

"Born and raised duck hunting in Stuttgart, Arkansas along with traveling around the country gathering footage for RNT-V, I have had the opportunity to shoot several different shotguns. For me, the Winchester Super X<sup>3</sup> is hands down the best fitting, best handling, most reliable shotgun I have ever shot. The Super X3 has done everything I have ever asked a shotgun to do — every time I pull the trigger."

# SUPER X<sup>3</sup> STRUT STOPPER.

Here's the shotgun specifically designed to stop Mr. Tom in mid-strut. The Winchester<sup>®</sup> Super X3 NWTF<sup>®</sup> Cantilever Turkey features a 24" barrel with a 3½" chamber, a cantilever scope base and fully-adjustable TruGlo<sup>®</sup> fiber-optic sights. The Active Valve gas system helps tame felt recoil from those heavy turkey loads, while the Invector-Plus<sup>™</sup> Extra-Full Turkey choke tube funnels all those pellets in a tight pattern that puts more pellets on your trophy. Don't take an inferior shotgun after the largest and smartest game bird in the woods. Bust that bird and earn your spurs with the Super X3 NWTF Cantilever Turkey — the fastest shotgun ever to stop a strutter.

## SX3

### EXTRA-FULL TURKEY CHOKE TUBE

A tight, dense pattern of heavy shot is critical for taking turkeys. You get an Invector-Plus<sup>™</sup> Extra-Full Turkey choke tube standard with the Super X<sup>3</sup> NWTF<sup>®</sup> Cantilever Turkey. The knurled band makes it easy to install or remove and the camo band won't give you away to a sharp-eyed tom.

# MODEL 101<sup>®</sup> THE PINNACLE OF ELEGANCE

The pinnacle of shotgun elegance has always been typified by a Belgian-made over and under — a tribute to Old World craftsmanship expressed in engraved steel and finely-cut checkered walnut. Now all that elegance can be yours at an attractive price few others can match. A low-profile receiver and mild recoil make the Model 101 extremely pleasant to shoot all day. The robust action has been tested by firing 25,000 shells without a single part failure. When you shoulder the Model 101 at your Winchester Repeating Arms dealer, you'll realize you've finally found the perfect over and under shotgun you've been seeking.

Today's Model 101<sup>®</sup> features the same **FAMILIAR DIMENSIONS** set long ago by the original. The familiar drop at comb and narrow, comfortable grip ensure time-tested comfort and performance.

The Model 101<sup>®</sup> has the drop on the original with the advantage of a **LOW-PROFILE RECEIVER**. This means that recoil occurs in-line, directly back for faster follow-up shots with less muzzle jump. Also, your forward hand can be closer to the bore centerline, bringing your hands, face and sighting plane into a more natural alignment for more intuitive and accurate shooting.

An **ADJUSTABLE COMB** stock allows you to modify individual height and cast on/off for a custom fit in just seconds. (Hex wrench is included.)

Every Model 101<sup>®</sup> has **FINELY CUT CHECKERING** to improve grip and add artistic elegance to the well-figured walnut stock and forearm.

An **ADJUSTABLE TRIGGER SHOE** lets you fine tune its fore and aft position to your precise length of pull for more comfortable shooting on Pigeon models. (Hex wrench is included.)

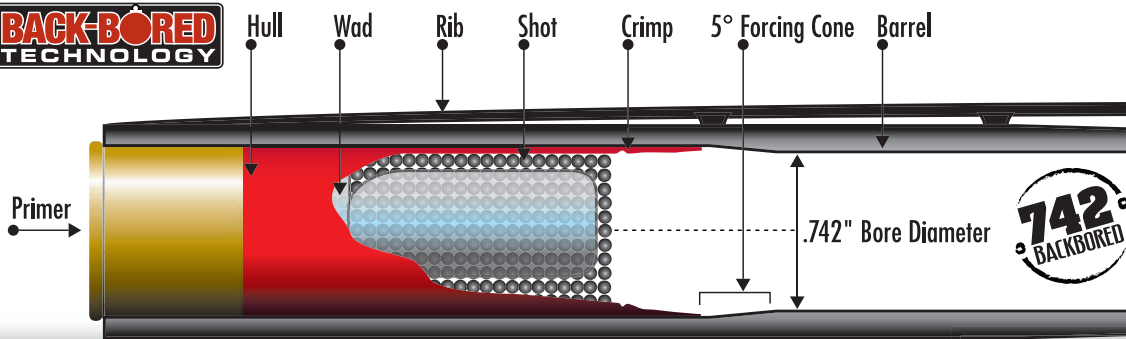

Getting pounded by recoil is now a thing of the past with the patented **PACHMAYR<sup>®</sup> DECELERATOR<sup>®</sup> RECOIL PAD** with snag-free heel. Found on all Model 101<sup>®</sup> shotguns, it reduces felt recoil to very manageable levels, even when shooting heavy magnum loads.

Sporting and Field models have a fitted **STEEL GRIP CAP** to add a touch of graceful elegance.

**BACK-BORED  
TECHNOLOGY**

**.742" BACK-BORED TECHNOLOGY** is based on extensive research and testing showing that when it comes to back-boring, .742" is the ideal 12 gauge interior barrel diameter, ensuring tight, consistent patterns. Any larger and gases blow by the shot cup and reduce pellet velocity. Too tight and the pellets are deformed as they pass through the forcing cone, causing poor ballistic performance.

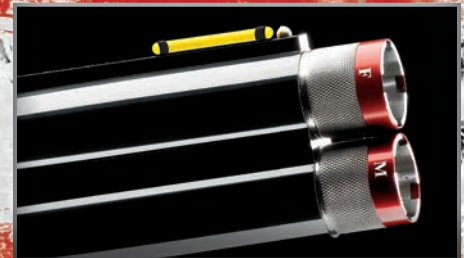

**CHROME PLATED CHAMBERS AND BORES** are found in all Winchester® Model 101® shotguns. This critical plating provides protection from thousands of heavy, high density, abrasive loads. This extra feature virtually eliminates wear and tear caused by thousands of shells.

**TOUGH STEEL HINGE** areas bear tension from recoil with each shot, so the Model 101® is built with surfaces that are 49% larger than many competitors. The surfaces are machined simultaneously with the hinge, ensuring perfect alignment.

From the field to the range, the **INVECTOR-PLUS™ CHOKE TUBE SYSTEM** is the world's most consistent. All Model 101® shotguns come with either extended Signature or flush-mounted Invector-Plus™ tubes, depending on the model. Additional tubes are available at your local Winchester Repeating Arms dealer.

**TRUGLO**

The Model 101® shotgun's **LOCKING LUGS** have 30% more contact surface than the competition for an action that's the strongest in the industry and built to last!

# MODEL 101<sup>®</sup> TWO ELEGANTLY REFINED SHOTS.

Whether your passion is trap, sporting clays or hunting afield, the Model 101 is the perfect shotgun for you. Every Winchester<sup>®</sup> Model 101 shotgun is built on a low-profile receiver to place your forward hand and eye closer to the centerline of the bore to give you faster target acquisition with less felt recoil. The end result is a classic over and under with a crisp, smooth and controlled swing that will put more birds on the ground and more hits on your scorecard. See for yourself when you shoulder a classic Model 101 at your Winchester Repeating Arms dealer.

**BACK-BORED TECHNOLOGY** **TRUGLO**

## SPORTING

- **HIGH GLOSS GRADE II / III WALNUT STOCK WITH 20 LINES-PER-INCH CUT CHECKERING** looks elegant and improves grip

# HISTORICAL. RIDE THE HIGH COUNTRY.

No other firearm brand can lay claim to the legendary reputation of Winchester Repeating Arms®. Through the genius of John M. Browning, many of these all-time favorites are forever a part of America's history. From blazing a trail across the Great Plains to facing down a charging grizzly on a narrow path in the High Rockies, many of the men whose legendary courage tamed the Wild West chose to be armed with a genuine Winchester rifle or carbine. It was the gun they carried with absolute confidence, knowing that their lives and livelihoods depended on it shooting straight and true every time they pulled the trigger.

These magnificent historic rifles are limited production models and each one is crafted to the most exacting standards. This level of quality takes time and talent, and with so many classic variations in detail — like case colored receivers, different barrel lengths, deluxe and commemorative models in both rifles and carbines — it means that Winchester Repeating Arms will not have every historic model in the product line every year. So if you want a specific model that you see in this catalog, you best get on down to your local Winchester Repeating Arms dealer and add it to your rifle rack today. It may be several years before that specific model comes back into the Winchester rifle round-up. And if you don't see the rifle or carbine that's just right for you, please be patient. You can bet your spurs Winchester Repeating Arms is already working on it for an introduction somewhere down the trail.

CRESCENT

CARBINE

SHOTGUN

RIFLE FOREARM CAP

CARBINE BAND

Winchester® historic rifles have long been offered with **TRADITIONAL BUTTPLATE DESIGNS** including a **CRESCENT METAL PLATE**, a **METAL CARBINE STRAP** and several variations of the classic flat **SHOTGUN BUTTPLATE**.

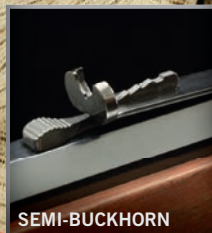

Classic Winchester® firearms are often fitted with a **RIFLE FOREARM CAP** or a **CARBINE BAND** to add that authentic touch every cowboy wants.

STRAIGHT

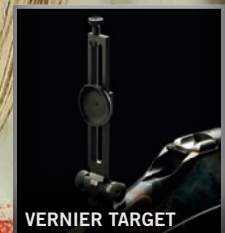

CURVED PISTOL

SEMI-BUCKHORN

CARBINE LADDER

VERNIER TARGET

The **TRADITIONAL STRAIGHT GRIP** or a **CURVED PISTOL GRIP** are two hallmarks of a genuine Winchester® rifle or carbine.

Over the decades Winchester® rear sight designs have included the **SEMI-BUCKHORN**, the **CARBINE LADDER SIGHT** and the **VERNIER TARGET SIGHT**.

The **MODEL 1873** is widely credited as being “The Gun that Won the West®.” Chambered in the popular handgun calibers of the day, it’s been produced in carbine, rifle and musket models. Cowboy Action Shooters love the reliable Model 1873 because it fires the same ammo as their revolvers.

The **MODEL 1885 HIGH WALL** was John M. Browning’s first commercial firearm design for Winchester®. This stout falling-block action is so versatile it’s been chambered in pistol cartridges up to the powerful belted magnums. It’s remained the gold standard of single shot rifles for more than 125 years.

Introduced late in the year of 1885, the **LOW WALL** variant of the High Wall has a smaller receiver designed to handle lower-powered cartridges. Offered in rimfire and centerfire chamberings, it’s ideal for target shooting, varmint hunting or whenever delivering one shot with pinpoint accuracy is a must.

The **MODEL 1886** was John M. Browning’s next design for Winchester®. Robust and accurate, it’s capable of handling the long, powerful black powder “buffalo” cartridges popular on the Western Plains. The 45-70 Government is the all-time classic chambering for this robust rifle design.

The **MODEL 1892** is the classic American saddle carbine®. Designed for shorter pistol-class cartridges, it allowed a working cowboy to have a revolver and rifle chambered for the same ammunition. From the silent film era to today’s lavish blockbusters, the Model 1892 is the all-time iconic rifle of American Western cinema.

The **MODEL 1894** was the quintessential American woods rifle. Designed for mid-powered rimmed cartridges, the Model 1894 has probably taken more deer than any other rifle in history. Every American family ought to have at least one Model 1894 in their gun rack.

The **MODEL 1895** was designed with an internal box magazine, allowing the use of pointed bullets and the then-new bottleneck cartridges loaded with smokeless powder. Theodore Roosevelt called it his “Medicine Gun” and he used it with great success on his 1909 African safari.

The **MODEL 71** is a modified version of the Model 1886 introduced by Winchester® in 1935. It’s chambered for the robust 348 Winchester cartridge. Designed for taking deer, black bear and even moose, the Model 71 is also perfect for taking a trophy boar on your next wild hog hunt.

# HISTORICAL THE GUN THAT WON THE WEST.

The Model 73 is world-renowned as "The Gun that Won the West." Now you can own the real thing — a genuine Winchester Repeating Arms® Model 73 with an oil-finished walnut stock, classic blued steel crescent buttplate and a 20" round barrel, just like the original. If you're the type of collector who won't settle for second best or a copy of a copy, fill your hands with this magnificent rifle, saddle up and blaze your trail into the sunset.

A new **FIRING PIN/STRIKER BLOCK** provides an added margin of safety.

The **ULTRA-SMOOTH ACTION** is competition ready right out of the box.

The **BRASS CARRIER BLOCK** is designed to eject fired cases away from the shooter.

# MODEL 1873 SHORT RIFLE

- **WALNUT STRAIGHT GRIP STOCK** with a satin oil finish that's velvet smooth to the touch
- **CLASSIC RIFLE STYLE FOREARM** with blued steel cap for the timeless look and feel of the original Model 73
- **BLUED STEEL CRESCENT BUTTPLATE** slips into your shoulder for a solid hold
- **ROUND 20" BARREL WITH FULL-LENGTH MAGAZINE TUBE** holds 10 rounds of 357 Magnum or 11 rounds of 38 Special ammunition
- **SEMI-BUCKHORN REAR SIGHT WITH MARBLE ARMS® GOLD BEAD FRONT SIGHT** gets you on target quickly
- **STEEL LOADING GATE** for smoother loading
- **RECEIVER REAR TANG** is drilled and tapped for optional tang-mounted rear sight for a more precise sight picture

# MODEL 94<sup>®</sup> TAKE DOWN A NICE TROPHY OR TWO.

The Winchester<sup>®</sup> Model 94<sup>®</sup> is the world's most popular lever-action and today's rifles utilize the latest manufacturing technology to bring you the most accurate models ever produced. The Trails End Takedown rifle incorporates John M. Browning's original takedown design to quickly separate into two compact components for storage or transport. The Trails End Takedown chambered in the hard-hitting 450 Marlin is ported for less muzzle jump and is fitted with a comfortable Pachmayr<sup>®</sup> Decelerator<sup>®</sup> recoil pad. The new Model 94 Carbine is perfect for hunting in thick brush for deer, bear, wild hogs and other fast-moving game. Pick your Model 94 and pick out your target.

**TAKE DOWN** the Model 94® into two compact components — the barrel assembly and the stocked receiver assembly then slip it into your backpack, wrap it in your bedroll, strap it on your ATV or tuck it behind the seat of your truck, boat or bush plane.

**REASSEMBLY** is easy. Put the two pieces together, give the end of the magazine tube a few turns and you have a full-length rifle with the same superb accuracy as the other models.

# TRAILS END TAKEDOWN

- **WALNUT STOCK** with satin finish, authentic straight-grip styling and a blued steel forearm cap offer a nostalgic look
- **TRADITIONAL JOHN M. BROWNING-DESIGNED TAKEDOWN MECHANISM** is fast and easy to operate
- **TRIPLE-CHECKED BUTTON RIFLED BARREL** for the ultimate in accuracy and precision
- **ROUND LOCKING BOLT TRUNNIONS HELP** ensure a smooth, quick lever throw
- **TOP-TANG SAFETY** is easy to see and operate
- **REBOUNGING HAMMER** provides an added margin of safety
- **BOLT RELIEF CUT** reduces hammer drag for smoother cocking
- **RADIUSED LEVER EDGES** give added protection to your fingers
- **HAMMER** is drilled and tapped for **KNURLED HAMMER SPUR EXTENSION** (included) to aid in cocking and decocking the hammer when a scope is mounted
- **MARBLE ARMS® FRONT SIGHT AND ADJUSTABLE SEMI-BUCKHORN REAR SIGHT** get you on target quickly
- **STEEL LOADING GATE** for smoother loading
- **ARTICULATED CARTRIDGE STOP** improves feeding reliability without damaging cartridges
- **DRILLED AND TAPPED FOR SCOPE MOUNTS** lets you easily attach your favorite optics

# NEW CARBINE

- **WALNUT STOCK** with satin finish, authentic straight-grip styling and a blued steel forearm band offer a nostalgic look
- **BLUED STEEL CARBINE STRAP BUTTPLATE** for smooth and easy shouldering
- **TRIPLE-CHECKED BUTTON RIFLED BARREL** for the ultimate in accuracy and precision
- **ROUND LOCKING BOLT TRUNNIONS HELP** ensure a smooth, quick lever throw
- **TOP-TANG SAFETY** is easy to see and operate
- **REBOUNGING HAMMER** provides an added margin of safety
- **BOLT RELIEF CUT** reduces hammer drag for smoother cocking
- **RADIUSED LEVER EDGES** give added protection to your fingers
- **HAMMER** is drilled and tapped for **KNURLED HAMMER SPUR EXTENSION** (included) to aid in cocking and decocking the hammer when a scope is mounted
- **MARBLE ARMS® FRONT SIGHT AND ADJUSTABLE SEMI-BUCKHORN REAR SIGHT** get you on target quickly
- **STEEL LOADING GATE** for smoother loading
- **ARTICULATED CARTRIDGE STOP** improves feeding reliability without damaging cartridges
- **DRILLED AND TAPPED FOR SCOPE MOUNTS** lets you easily attach your favorite optics

# MODEL 94

# MODEL 94<sup>®</sup> WORLD'S MOST FAMOUS LEVER.

What makes the Winchester<sup>®</sup> Model 94 so exciting is the variety of models available, and each offers a level of accuracy that will impress you. The Sporter model with its traditional straight-grip stock, blued steel crescent buttplate, and the elegant half-round, half-octagon barrel is a nostalgic favorite. The satin oil finished walnut stock is finely checkered with double-line bordering. The Short Rifle's 20" barrel makes it quick-swinging, lightweight and lightning fast in the brush. It has a rifle-style forearm with blued steel forearm cap and a full-length magazine. The receivers on both rifles are drilled and tapped for mounting a scope. The Winchester Model 94 — It's a joy to own, fun to show off and a hoot to shoot.

## SPORTER

▪ **WALNUT STOCK** with satin finish, authentic straight-grip styling, bordered cut checkering and a blued steel forearm cap offer a nostalgic look ▪ **BLUED CRESCENT BUTTPLATE** slips firmly into your shoulder for a solid hold ▪ **TRIPLE-CHECKED HALF ROUND / HALF OCTAGON BUTTON RIFLED BARREL** for the ultimate in accuracy and precision ▪ **ROUND LOCKING BOLT TRUNNIONS HELP** ensure a smooth, quick lever throw ▪ **TOP-TANG SAFETY** is easy to see and operate ▪ **REBOUNDED HAMMER** provides an added margin of safety ▪ **BOLT RELIEF CUT** reduces hammer drag for smoother cocking ▪ **RADIUSSED LEVER EDGES** give added protection to your fingers ▪ **HAMMER** is drilled and tapped for **KNURLED HAMMER SPUR EXTENSION** (included) to aid in cocking and decocking the hammer when a scope is mounted ▪ **MARBLE ARMS<sup>®</sup> FRONT SIGHT AND ADJUSTABLE SEMI-BUCKHORN REAR SIGHT** get you on target quickly ▪ **STEEL LOADING GATE** for smoother loading ▪ **ARTICULATED CARTRIDGE STOP** improves feeding reliability without damaging cartridges ▪ **DRILLED AND TAPPED FOR SCOPE MOUNTS** lets you easily attach your favorite optics

# HISTORICAL OWN A PIECE OF THE WILD WEST.

The Model 1886™ was the biggest, meanest lever-action repeater of its day. Designed to handle potent cartridges like the classic 45-70 Government, the robust Model 1886 was more than a match for grizzly bear, bull elk and bison. The saddle-wise Model 1892 shares the double locking bolt system of the Model 1886 but was designed to handle the shorter pistol calibers of yesteryear, allowing a working cowboy to use the same ammunition in both carbine and revolver. Cowboy Action Shooters love the short lever throw of the Model 1892 and so will you.

## MODEL 1886™ SHORT RIFLE

- WALNUT STOCK GRADE I, SATIN FINISH for deep grain beauty, STRAIGHT GRIP for genuine good looks and fast handling
- STEEL CRESCENT BUTTPLATE adds traditional look while protecting the buttstock
- FULL-LENGTH MAGAZINE provides balance, classic lines and higher capacity
- TOP-TANG SAFETY is easy to see and operate
- REBOUNDED HAMMER provides added margin of safety
- MARBLE ARMS® FRONT SIGHT with brass bead for easier sighting
- ADJUSTABLE REAR SIGHT gets you on target with any ammo
- STEEL LOADING GATE for smoother loading
- BARREL is button-rifled with recessed crown for ultimate accuracy
- RECEIVER is drilled and tapped for traditional side mounted receiver sight

## MODEL 1892 CARBINE

- WALNUT STOCK with satin finish, authentic straight-grip styling and blued steel carbine strap offer a nostalgic look
- STEEL CONTOURED CARBINE STRAP BUTTPLATE is quick to shoulder and protects buttstock from damage
- TRIPLE-CHECKED BUTTON RIFLED BARRÉL for the ultimate in accuracy and precision
- TOP-TANG SAFETY is easy to see and operate
- REBOUNDED HAMMER provides added margin of safety
- LOOP LEVER with radiused edges gives added protection to your fingers
- MARBLE ARMS® FRONT SIGHT AND ADJUSTABLE SEMI-BUCKHORN REAR SIGHT get you on target quickly
- SADDLE RING allows attaching rifle to your saddle
- STEEL LOADING GATE for smoother loading

A SADDLE RING is an eye-catching feature typical of historic carbines, letting you secure the rifle to the saddle with a leather strap.

# HISTORICAL

# MODEL 70<sup>®</sup> TOUGH. TOUGHER. AND TOUGHEST.

For more than 75 years the Model 70 has been the best-known and most respected bolt-action rifle design in the entire world. Embraced by savvy sportsmen everywhere, it has endured as The Rifleman's Rifle. No other centerfire bolt-action rifle enjoys a reputation for pinpoint accuracy and robust reliability like the real thing — the Winchester<sup>®</sup> Model 70.

## STAINLESS STEEL COMPONENTS

The trigger housing and all internal components of the M.O.A. Trigger System are constructed of durable, corrosion-resistant stainless steel.

## ZERO TAKE-UP

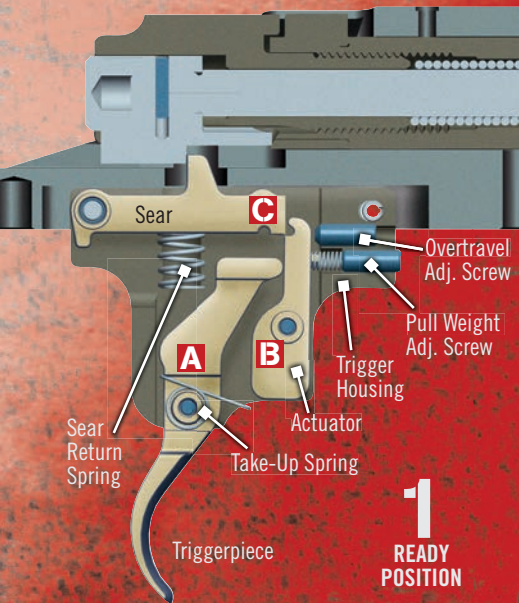

Take-up is the distance the triggerpiece travels prior to the sear moving toward release and the shooter feeling resistance. The M.O.A. Trigger System uses a spring to eliminate take-up by keeping the triggerpiece in constant contact with the actuator. Unlike competitors' designs, the unique geometry of the M.O.A. pre-loads the entire trigger system to bias out normal manufacturing tolerances.

## ZERO CREEP

Creep is the perceptible movement of the trigger prior to the release of the firing pin and has a negative influence on accuracy causing inconsistency and uncertainty during the pull of the trigger. Creep contributes to jerking the trigger, thus adding to movement of the gun during firing. The 2:1 mechanical advantage created by the M.O.A. Trigger's unique design geometry has virtually eliminated creep in the Model 70<sup>®</sup> M.O.A. Trigger.

## ZERO OVERTRAVEL

Overtravel is the rearward movement of the trigger after the firing pin has been released. It can actually jar the gun away from its intended point of aim and is very distracting to the shooter. The Model 70<sup>®</sup> M.O.A. Trigger System is set at the factory to have no perceptible overtravel. When the sear drops, the trigger stops! Where you aim is where you shoot.

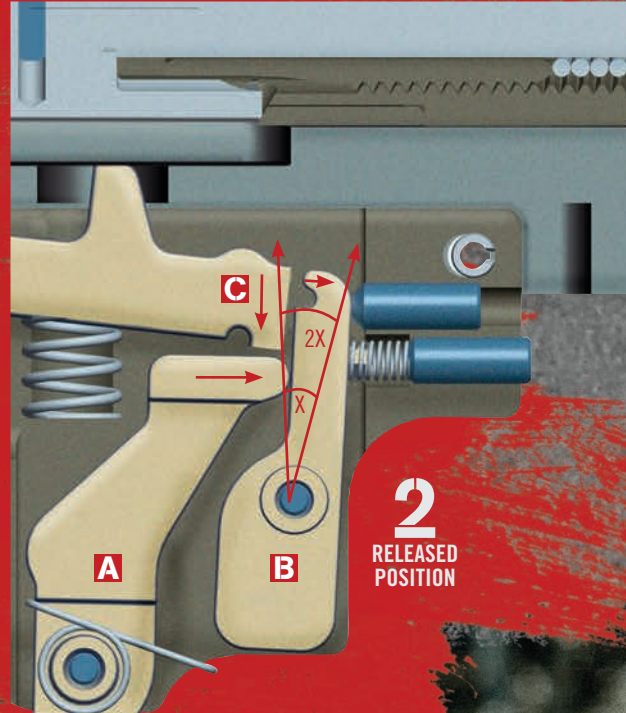

**1**  
READY  
POSITION

## 1) M.O.A. TRIGGER SYSTEM

The Model 70<sup>®</sup> M.O.A. Trigger System works on the simple principle of the pivoting lever. Pictured at the left are the triggerpiece (A), actuator (B), and sear (C). The housing and all internal parts, pins and springs are precision crafted from stainless steel. In addition, the sear and actuator are Slick Shot<sup>®</sup> electroless nickel Teflon<sup>®</sup> coated for corrosion resistance and smoother operation.

## 2) 2:1 MECHANICAL ADVANTAGE

The M.O.A.'s triggerpiece offers a wide, smooth face to better distribute finger pressure for a lighter, more sensitive feel. Because of its geometry and 2:1 mechanical advantage, the triggerpiece travels only half the distance of the actuator (2X). Since this distance is cut in half, the perception of creep and overtravel are virtually eliminated.

**2**  
RELEASED  
POSITION

WANNA  
SEE  
TOUGH?  
Scan this

Every Model 70® has a **THREE-POSITION SAFETY** that is convenient to operate with the thumb of your firing hand. The design retracts the firing pin away from the sear. When the safety selector is in the middle position, the action can still be operated, allowing unfired cartridges to be cycled with the safety on. It's smooth to engage and easily identifies by sight and feel the safety status of the rifle.

**THE STEEL RECEIVER IS FORGED** for superior material properties. Each forging is precision machined to create a strong, stiff and solid receiver that resists flexing and delivers top accuracy over a lifetime of shooting. The bottom profile of the Model 70® receiver is flat to offer more surface area for bedding. It's then bedded at the front and rear to eliminate shifts in zero and preserve pinpoint accuracy. The flat bottom contour also resists twisting inside the stock during firing, making it superior to the competitions' round bottom receivers.

**THE INTEGRAL RECOIL LUG** on the Model 70® is actually forged and machined as part of the receiver. It's a block of solid steel, not a mere washer or tab that's just sandwiched between the barrel and the action during assembly. This allows the barrel to be trued in perfect alignment to the front ring of the receiver for greater accuracy. There is nothing to move, settle or shift the barrel out of alignment, ever. It's what makes a Model 70 shoot straight and true, year after year.

**A BLADE-TYPE EJECTOR** gives you full control when ejecting a fired case. Pull the bolt back slowly and the empty case pops out gently — perfect for target shooters and varminters. Pull the bolt back smartly and the empty case clears the port with greater force.

The trigger guard and magazine frame of each Model 70® feature a solid, **ONE-PIECE BOTTOM METAL** supporting the action through the magazine well. This added rigidity contributes to accuracy and integrity better than two-piece or plastic systems. The hinged magazine floorplate speeds unloading of the cartridges, to avoid having to cycle them through the action. The action and trigger guard are held in place by stout hex head screws.

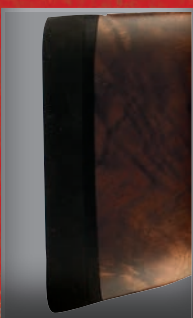

If there were a single feature responsible for the Model 70® being labeled the "Bolt-Action Rifle of the Century," it would be the classic **CONTROLLED ROUND FEED AND CLAW EXTRACTOR (CRF)** bolt design. The Pre-'64 style massive claw extractor smoothly slips onto and secures the cartridge's base, exerting full control from the very moment it leaves the magazine and enters the chamber, gripping tightly until it's fully ejected. This time-proven design allows an unfired cartridge to be extracted even if it is not yet fully chambered.

You can expect **1 MOA ACCURACY** for three-shot groups from your Model 70® using high-quality ammo and optics under suitable weather and range conditions.

Every Model 70® features a **RECESSED TARGET CROWN** at the muzzle to protect the rifling from nicks and dings. Each bullet exits the barrel uniformly, with ultimate precision.

The **RECOIL PAD** on Model 70® rifles (except the Ultimate Shadow models) is a premium Pachmayr® Decelerator® recoil pad. This ideally contoured pad's contact area offers optimal protection against felt recoil.

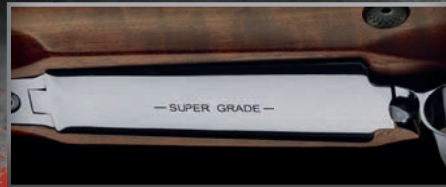

A critical feature of any high-powered rifle is how the barrel is made and set in the stock. Most Model 70® barrels are **COLD HAMMER-FORGED AND FREE-FLOATING** — forged from a solid billet of steel, shaped by massive rotary hammers over a mandrel to create the rifling. Then each barrel is stress relieved to ensure top accuracy, even during the heat of long strings of fire. The Model 70 barrel is free-floating in the stock so that no part of the fore-end touches the barrel, because pressure from the stock adversely influences accuracy.

# MODEL 70<sup>®</sup> THE DISTINGUISHED RIFLEMAN'S RIFLE.

Its highly polished, deeply-blued steel and finely checkered, fancy grain walnut stock with shadowline cheekpiece define the timeless grace and elegance of the Model 70 Super Grade. The Model 70 Sporter is pure and traditional — the essence of a bolt-action rifle for the serious sportsman.

**A ONE-PIECE STEEL BOTTOM METAL** adds extra rigidity to the Super Grade's stock and action for improved accuracy.

**THE SUPER GRADE'S SHADOWLINE CHEEKPIECE** is beautifully functional, placing your eye in perfect alignment with the scope.

# MODEL 70<sup>®</sup> ALL-TIME CLASSICS.

Generations of serious hunters have made the Model 70 Featherweight the iconic all-around rifle for any hunt. Easy-to-carry, accurate and utterly reliable, the Featherweight is ideal for deer, varmints, hogs and antelope. The Featherweight Compact is sized to let younger and smaller-statured shooters requiring a shorter length of pull to experience the Winchester<sup>®</sup> mystique for themselves.

## FEATHERWEIGHT COMPACT

▪ SATIN FINISH WALNUT STOCK WITH SHORTER LENGTH OF PULL, CLASSIC FEATHERWEIGHT CUT CHECKERING AND SCHNABEL FOREARM create the iconic Featherweight look ▪ POLISHED METAL SURFACES add style and elegance ▪ ALLOY ONE-PIECE BOTTOM METAL adds rigidity for better accuracy ▪ FORGED STEEL SHORT ACTION RECEIVER WITH INTEGRAL RECOIL LUG IS BEDDED FRONT AND REAR to eliminate shifts in zero for exceptional long-range accuracy ▪ PRE-'64 STYLE CONTROLLED ROUND FEED WITH CLAW EXTRACTOR fully controls cartridge from magazine, to chamber, to ejection ▪ THREE-POSITION SAFETY shows safety status at a glance ▪ 20" COLD HAMMER-FORGED FREE-FLOATING FEATHERWEIGHT PROFILE BARREL for years of pinpoint accuracy ▪ RECESSED TARGET CROWN enhances accuracy and protects the rifling ▪ M.O.A. TRIGGER SYSTEM with zero take-up, zero creep and zero overtravel gives you outstanding accuracy ▪ BLADE-TYPE EJECTOR for full control of ejection force ▪ PACHMAYR<sup>®</sup> DECELERATOR<sup>®</sup> RECOIL PAD for optimal protection against felt recoil

**CROSS SECTION OF STOCK WITH ALUMINUM BEDDING BLOCK**

**TOP VIEW OF ALUMINUM BEDDING BLOCK**

A **ONE-PIECE ALUMINUM BEDDING BLOCK** in the Extreme Weather SS and the Coyote Light is molded right into the stock during manufacturing, providing a solid, rigid base. This feature ensures flat-out reliability. The rifle holds a tight zero, placing every shot where you aim — dead on, in any weather condition, in any season.

The Extreme Weather SS has a **SCULPTED CHEEKPIECE** that's beautifully functional, placing your eye in perfect alignment behind a scope.

# EXTREME WEATHER SS

- **BELL AND CARLSON™ SYNTHETIC STOCK** with **SCULPTED CHEEKPIECE** has a charcoal gray textured finish

# MODEL 70<sup>®</sup> THE ULTIMATE IN CAMO.

Nothing says you're a serious hunter like carrying a Model 70 in the woods, and nothing lets you disappear into those same woods like Mossy Oak<sup>®</sup> Break-Up Infinity<sup>®</sup>. New for 2013, these camo beauties are available in either blued steel or stainless steel. Both rifles have rugged synthetic stocks with raised rubber gripping surfaces, Controlled Round Feeding and the M.O.A. Trigger System. Try one out and you'll agree it's the best rifle in your neck of the woods.

## WINCHESTER® CHOKE TUBES

Winchester Signature choke tubes are unsurpassed in the shotgun industry. In collaboration with Briley®, one of the most renowned makers of choke tubes in the world, the Invector-Plus™ and Standard Invector™ tubes are carefully machined from the best materials and calibrated to the strictest tolerances to deliver shot patterns exceeding your highest expectations. Installing these tubes in your barrel ensures that you are getting optimum patterning for the most challenging of wild game and the most difficult presentations in clay target shooting.

## WINCHESTER® SCOPE BASES AND RINGS

Make sure your favorite Winchester® firearm carries its scope with Winchester bases and rings. Designed and manufactured with absolute precision, the unitized mount is machined from 7000-series aircraft grade aluminum alloy. It integrates the mounting base with the lower portion of the scope ring so there is nothing to come out of alignment that might cause your scope to lose zero. Integrated mounts are available in both 1" and 30mm ring diameters, in low, medium or high ring heights and in your choice of a matte black or gloss black finish to match your scope and firearm. Weaver®-style alloy bases are available for Super X® Pump, Super X®3 and Super X®2 shotguns. Traditional steel bases and rings are also available in a gloss black finish for the Model 70® and the Model 1885®. These scope bases and rings are easy to install and should, with proper care, provide you with years of accurate and dependable service. Complete installation instructions are included with each ring set.

**MODEL 70 INTEGRATED BASES** help ensure your scope will stay zeroed in adverse conditions.

**RINGS AND BASES** are available in both **MATTE** and **GLOSS FINISHES** to match scope and firearm.

**BASES for WINCHESTER® SHOTGUNS** accept most Weaver®-style rings.

**BASES for 1885 RIFLES** accept Winchester®-style rings.

## GOULD BROTHERS EXHIBITION SHOOTING TEAM JOINS WINCHESTER REPEATING ARMS.

Aaron and Steve Gould are the most exciting exhibition shooting team ever to dust a clay target. Wowing crowds across the nation with their incredible shooting demonstrations, the Goulds demand shotguns with the speed and reliability to set a blistering pace. That's why they insist on the Winchester® Super X®3 autoloader and the Super X® Pump.

Look for the Gould Brothers Exhibition Shooting Team at a range near you. To see them now, scan the code.

We proudly support these organizations.
